AUD7327 - Evaluation and Fitting of Amplification Systems

AUD 7327 Evaluation and Fitting of Amplification Systems (3 semester hours) Advanced study of digital technology in amplification systems including compression, noise reduction, signal-to-noise ratio enhancement, feedback suppression, frequency lowering technology and speech enhancement strategies. Verification of advanced features in hearing aid delivery. Examination of new developments in hearing aid technologies. (3-0) Y (2016-02-05 22:00:05)
