School of Natural Sciences and Mathematics

Bioinformatics and Computational Biology Program

Program Faculty

Associate Professor: Yan Cao

Assistant Professors: Swati Biswas, Min Chen

Affiliated Faculty: Zhenyu Xuan, Hyuntae Yoo, Michael Qiwei Zhang

Master of Science in Bioinformatics and Computational Biology

36 hours minimum

The Master of Science in Bioinformatics and Computational Biology (BCBM) is offered jointly by the Departments of Mathematical Sciences and Molecular and Cell Biology. This program will combine coursework from the disciplines of biology, computer science, and mathematics. The BCBM program seeks to answer the demand for a new breed of scientist who has fundamental understanding in the fields of biology, mathematics, statistics, and computer science. With this interdisciplinary training, these scientists will be well prepared to meet the demand and challenges that have arisen and will continue to develop in the biotechnology arena.

Faculty from both Mathematical Sciences (MMS) and Molecular and Cell Biology (MCB) will participate in the Bioinformatics and Computational Biology program, with the Mathematical Sciences Department serving as the administrative unit. Both departments will participate in advising students.

For the Master's degree in Bioinformatics and Computational Biology, beginning students are expected to have completed multivariate calculus, linear algebra, two semesters of general chemistry, two semester of organic chemistry, two semesters of general physics, programming in C/C++, and two semesters of biology.

Requirements for completing a degree in BCBM are:
Core Courses

BIOL 5410  Biochemistry
BIOL 5420  Molecular Biology
BIOL 5381  Genomics
STAT 5351  Probability and Statistics I
STAT 5352  Probability and Statistics II
MATH 6341  Bioinformatics

Additional Core Courses for the Computational Biology Track

MATH 6313  Numerical Analysis
MATH 6343  Computational Biology
MATH 6345  Mathematical Methods in Medicine and Biology

Additional Core Courses for the Bioinformatics Track

CS 5333  Discrete Structures
CS 5343  Algorithms Analysis & Data Structures
CS 6360  Database Design

Elective Courses

A minimum of 7 semester credit hours of electives, approved by the student's advisor. Typically, electives are 6000- and 7000-level courses in mathematical sciences, biology or computer science.

Courses from other disciplines may also be used upon approval.
