MIS6319 - Enterprise Resource Planning

**MIS 6319** Enterprise Resource Planning (3 semester credit hours) Examines the role of enterprise systems in organizations. It will focus on business processes, business process integration, and information technology for enabling the integration. The course also covers selection and implementation of ERP systems. A part of the course will be set aside for demonstration and 'hands on' exercises with one of the available ERP software. (3-0) Y (2016-02-05 18:05:10)
