MECH 2320 (ENGR 2332) Mechanics of Materials (3 semester credit hours) Lecture course. Introduction to stress and deformation analysis of basic structural elements subjected to axial, torsional, bending, and pressure loads. Prerequisites: \( \text{MATH 2415} \) or \( \text{MATH 2419} \) and \( \text{MECH 2310} \). Corequisite: \( \text{MECH 2120} \). (3-0)
