Erik Jonsson School of Engineering & Computer Science

Graduate Program in Computer Science

Program Faculty

**Professor Emeritus:** Klaus Truemper

**Associate Professors:** Sergey Bereg, Lawrence Chung, Jorge A. Cobb, Kendra M. L. Cooper, Xiaohu Guo, Kevin Hamlen, Sandra M. Harabagiu, Murat Kantarcioğlu, Yang Liu, Neeraj Mittal, Yu-Chung (Edwin) Ng, Kamil Sarac, Haim Schweitzer, Yuke Wang, Rym Zalila-Wenkstern

**Assistant Professors:** Alvaro Cárdenas, Mark Gabel, Vibhav Gogate, Zhiqiang Lin, Cong Liu, Ryan McMahan

**Senior Lecturers:** Ebru Cankaya, Michael Christiansen, John Cole, Chris I. Davis, Timothy (Edwin) Farage, Shyam Karrah, Pushpa Kumar, Linda Morales, Nhut Nguyen, Greg Ozbirn, Mark Paulk, Miguel Razo-Razo, Charles Shields Jr., Jason W. Smith, Janell Straach, Jeyakesavan (Jey) Veerasamy, Don G. Vogel

Objectives

The Graduate Program in Computer Science provides intensive preparation in the design, programming, theory, and applications of computers. The Department of Computer Science offers courses of study leading to the MS in Computer Science, the MS in Computer Science - Software Engineering, PhD degree in Computer Science, and the PhD degree in Software Engineering. Training is provided for both academically oriented students and students with professional goals in the many business, industrial or governmental occupations requiring advanced knowledge of computer theory and technology. Courses and research are offered in a variety of subfields of computer science, including operating systems, computer architecture, computer graphics, pattern recognition, automata theory, combinatorics, artificial intelligence, data and network security, natural language processing, database design, computer networks, programming languages, software systems, analysis of algorithms, computational complexity, software engineering, software testing, software reliability, scheduling, visualization, fault-tolerant computing, parallel processing, telecommunications networks, telecommunications software, performance of systems, VLSI, computational geometry, and design automation.
A comprehensive program of evening courses is offered which enables part-time students to earn the master's degree or to select individual courses of interest.

Facilities

The Department of Computer Science has a large number of PCs, Sun Workstations, and several servers for research use. Laboratories are available for parallel processing, distributed systems, software engineering, high-performance computing, graphics, programming languages and systems, telecommunications, CAD and graph visualization, image understanding and processing, artificial intelligence, data mining, natural language processing, speech processing, and web technologies. The Department of Computer Science has an Internet 2 connection and all major computers on campus are linked by an Ethernet network.

In addition to the Computer Science faculty, there are individuals who are involved in computer related work in many other areas of the University, including the several physical and social sciences and in various areas of business and management. Students majoring in computer science with interest in these important application areas have the opportunity to consult and work with talented faculty from a wide range of disciplines. The department actively participates in a number of interdisciplinary degree programs which include MS and PhD in Computer Engineering, MS and PhD in Telecommunications Engineering, and PhD in Geospatial Information Sciences.

Master of Science in Computer Science

33 hours minimum

Admission Requirements

The University's general admission requirements are discussed on the Graduate Admission page (catalog.utdallas.edu/2013/graduate/admission).

The student entering the Computer Science MS program should have an undergraduate preparation equivalent to a baccalaureate in a quantitative science, including calculus and linear algebra. However, special arrangements (requiring more than the minimal number of hours) can be made for students with good undergraduate preparation in other fields. Minimum requirements are:

- Bachelor's degree which includes 2 semesters of calculus and 1 semester of linear algebra.
- GPA of at least 3.0 (last 60 hours). GPA in quantitative courses of at least 3.3.
- GRE revised scores of 308, 153, 155, and 4 for the combined, verbal, quantitative, and analytical writing components, respectively, are advisable based on our experience with student success in the program.

Students lacking undergraduate preparation in Computer Science must complete the courses listed below. At the discretion of the graduate advisor, a diagnostic exam may be required. The required prerequisite courses common to all master's students are:
Required Prerequisite Courses

- **CS 5303** Computer Science I
- **CS 5330** Computer Science II
- **CS 5333** Discrete Structures
- **CS 5343** Algorithm Analysis & Data Structures
- **CS 5348** Operating Systems Concepts

Substitution of **CS 5303** and/or **CS 5330** by professional experience will be considered.

Additional prerequisite courses required for the various degree plans are:

For the Traditional Computer Science:

- **CS 5349** Automata Theory
- **CS 5390** Computer Networks

For the Networks and Telecommunications Track:

- **CS 3341** Probability and Statistics in Computer Science and Software Engineering
- **CS 5390** Computer Networks

For the Information Assurance Track:

- **CS 5390** Computer Networks

For the Major in Software Engineering:

- **CS 3354** (SE 3354) Software Engineering or **CS 5354** (SE 5354) Software Engineering

Degree Requirements

The University's general degree requirements are discussed on the [Graduate Policies and Procedures page](https://catalog.utdallas.edu/2013/graduate/policies/policy).

The student may choose a thesis plan or a non-thesis plan. The thesis plan requires a minimum of 27 hours of courses, plus completion of an approved thesis (six thesis hours). This thesis is directed by a supervising professor and must be approved by the head of the Department of Computer Science. The non-thesis plan also requires a minimum of 33 hours of courses.

By a judicious planning of courses chosen from the computer science curriculum, supervised and approved by the graduate advisor, students may pursue the MS degree in Computer Science while
emphasizing specific areas of the discipline. Students may also choose to receive the MS degree in Computer Science - Software Engineering (MSCS). Because of the rapidly changing nature of the computer science discipline, the specific courses required may change by the time of the student's admission. A listing of the required courses will be specified by the student's advisor. Specific degree requirements follow.

**Core Requirements (15 hours)**

Students are required to complete one of the following tracks:

**Traditional Computer Science Track**

**Track Required Courses**

- **CS 6363** Design and Analysis of Computer Algorithms
- **CS 6378** Advanced Operating Systems
- **CS 6390** Advanced Computer Networks

Two of the following three courses:

- **CS 6353** Compiler Construction
- **CS 6360** Database Design
- **CS 6371** Advanced Programming Languages

**Networks and Telecommunications Track**

**Track Required Courses**

- **CS 6352** Performance of Computer Systems and Networks
- **CS 6363** Design and Analysis of Computer Algorithms
- **CS 6378** Advanced Operating Systems
- **CS 6385** Algorithmic Aspects of Telecommunication Networks
- **CS 6390** Advanced Computer Networks

**Intelligent Systems Track**

**Track Required Courses**

- **CS 6320** Natural Language Processing
- **CS 6363** Design and Analysis of Computer Algorithms
One of the two following courses:

- **CS 6360** Database Design
- **CS 6378** Advanced Operating Systems

### Systems Track

**Track Required Courses**

- **CS 6304** Computer Architecture
- **CS 6363** Design and Analysis of Computer Algorithms
- **CS 6378** Advanced Operating Systems
- **CS 6396** Real-Time Systems

One of the following six courses:

- **CS 6360** Database Design
- **CS 6376** Parallel Processing
- **CS 6380** Distributed Computing
- **CS 6397** Synthesis and Optimization of High-Performance Systems
- **CS 6399** Parallel Architectures and Systems
- **CS 6349** Network Security

### Information Assurance Track

**Track Required Courses**

- **CS 6363** Design and Analysis of Computer Algorithms
- **CS 6378** Advanced Operating Systems
- **CS 6324** Information Security

Two of the following four courses:

- **CS 6301** Special Topics in Computer Science [subtitle: System Security and Malicious Code Analysis]
- **CS 6348** Data and Applications Security
One from the following courses:

- **CS 6390** Advanced Computer Networks
- **CS 6360** Database Design
- **CS 6371** Advanced Programming Languages

1. must have completed CS 5349 Automata Theory

---

**Master of Science in Computer Science - Software Engineering (MSCS)**

*33 hours minimum*

### Core Requirements

### Course Requirements

#### Track Required Courses

- **CS 6361 (SE 6361)** Advanced Requirements Engineering
- **CS 6362 (SE 6362)** Advanced Software Architecture and Design
- **CS 6367 (SE 6367)** Software Testing, Validation and Verification
- **CS 6387 (SE 6387)** Advanced Software Engineering Project

#### One of the following four courses:

- **CS 6353** Compiler Construction
- **CS 6360 (SE 6360)** Database Design
- **CS 6371** Advanced Programming Languages
- **CS 6388 (SE 6388)** Software Project Planning and Management

Students must satisfy the core requirements by either earning a 3.19 minimum grade point average OR by earning a 3.0 minimum grade point average in the five core courses and taking an extra approved elective (beyond the minimum degree requirements of 33 hours) and maintain the required GPA.
Electives (minimum of 18 hours)

Five (15 semester credit hours) 6000/7000/8000 level elective CS courses, or six hours of thesis or project courses plus three elective courses (6 + 9 = 15 credit hours), with approval of a graduate advisor; a minimum grade point average of 3.0 is required. Courses that are prerequisites to the student's core requirements are especially recommended. Approved electives must be taken to make a minimum of 33 hours.

Note: For the information assurance track, students must also take six elective courses (three CS electives and three approved information assurance electives), and all electives must be 6000 level or above. A course cannot be used to satisfy both core and elective requirements.

While the Department of Computer Science offers both the Master of Science in Computer Science and the Master of Science in Computer Science - Software Engineering degrees, students are not permitted to pursue both degrees.

Doctor of Philosophy in Computer Science

75 hours minimum beyond the baccalaureate degree

The Department of Computer Science offers a Doctor of Philosophy in Computer Science.

The doctoral program is tailored to the student. The student must arrange a course program with the guidance and approval of a faculty member chosen as his/her graduate advisor. Adjustments can be made as the student's interests develop and a specific dissertation topic is chosen.

Admission Requirements

The University's general admission requirements are discussed on the Graduate Admission page (catalog.utdallas.edu/2013/graduate/admission).

A student may be admitted under one of two possible options:

Admission Option One

- A master's degree in computer science or its equivalent, and
- A GPA of at least 3.5 and
- GRE revised scores of at least 308, 153, 155, 159, and 4 for the combined, verbal, quantitative, and analytical writing components, respectively, are advisable based on our experience with student success in the program.

Admission Option Two

- A BS in related area that includes two semesters of calculus and linear algebra with,
• GPA of at least 3.5 in the last 60 hours, and
• GRE revised scores of at least 315, 156, 159, and 4 for the combined, verbal, quantitative, and analytical writing components, respectively, are advisable based on our experience with student success in the program.

Degree Requirements

The University's general degree requirements are discussed on the [Graduate Policies and Procedures](catalog.utdallas.edu/2013/graduate/policies/policy) page.

Core requirements:

The core requirements for the PhD degree in Computer Science are the same as the ones listed on the [Master of Science in Computer Science](https://catalog.utdallas.edu/2013/graduate/programs/ecs/computer-science) page or on the [Master of Science in Computer Science - Software Engineering](https://catalog.utdallas.edu/2013/graduate/programs/ecs/computer-science) page.

Also required are:

• Pass a qualifying examination.
• Pass, with a grade of B or better, courses chosen as follows
  • **CS 6382** Theory of Computation
  • Two 7000 and above level courses with CS and/or SE prefixes
  • Sufficient CS electives for a total of at least 75 hours beyond the baccalaureate degree. At least 9 hours of organized advanced Computer Science electives must be taken at UT Dallas. The student is encouraged to consult with an advisor in choosing electives.

Dissertation

A dissertation is required and must be approved by the graduate program. A student must arrange for a dissertation advisor willing to guide this dissertation. The student must have a dissertation supervising committee that consists of no less than four members of whom at least three must be from the Computer Science faculty. The dissertation may be in computer science exclusively or it may involve considerable work in an area of application.

Doctor of Philosophy in Software Engineering

*75 hours minimum beyond the baccalaureate degree*

The Department of Computer Science offers a Doctor of Philosophy in Software Engineering.

The doctoral program is tailored to the student. The student must arrange a course program with the guidance and approval of a faculty member chosen as his/her graduate advisor. Adjustments can be made as the student's interests develop and a specific dissertation topic is chosen.
Admission Requirements

The University's general admission requirements are discussed on the Graduate Admission page (catalog.utdallas.edu/2013/graduate/admission).

A student may be admitted under one of two possible options:

Admission Option One

- A master's degree in computer science or its equivalent, and
- A GPA of at least 3.5 and
- GRE revised scores of at least 308, 153, 155, 159, and 4 for the combined, verbal, quantitative, and analytical writing components, respectively, are advisable based on our experience with student success in the program.

Admission Option Two
