The Naveen Jindal School of Management was established in 1975 as the academic unit responsible for (1) the Master of Science (MS) degree in Management and Administrative Sciences; (2) the Master of Science (MS) degree in International Management Studies; (3) the Doctor of Philosophy (PhD) degrees in Management Science and in International Management Studies; and (4) an upper-division program leading to a Bachelor of Science (BS) degree in Business Administration.

The School added a Master of Business Administration (MBA) degree in 1983, and in 1992, in conjunction with UT Dallas' expansion to include a full undergraduate program, lower-division instruction was initiated. The Master of Science in Accounting started in 1994. In 1996, the School added the Cohort MBA, a full-time MBA program in which students take all of their courses together in a fixed sequence.

In 1997, the School formed a strategic alliance with The University of Texas Southwestern Medical Center at Dallas to offer a Master of Science in Medical Management for medical doctors. In 1999, Global MBA (online) program was added in which students take all core and elective courses online (distance learning). In 2007, the program was split into two parts and renamed the Master of Science in Healthcare Management Executive Track in 2007 (for medical doctors) and the Master of Science in Healthcare Management Professional Track for all other healthcare professionals.

To help bridge the gap between business and information technology, the School established the Master of Science in Information Technology and Management in 2003. In Fall 2008, the School added two new masters' degree programs, the MS in Finance and the MS in Supply Chain Management. The School then added the MS in Innovation and Entrepreneurship, and the MS in Systems Engineering and Management, a joint degree with the Erik Jonsson School of Engineering and Computer Science, which both opened in 2010. The last degree to be added was the MS in Marketing in 2011.

Since its inception, the Naveen Jindal School of Management has offered a range of degree options and program formats designed to serve the diverse needs of a student population primarily composed of working adults, but also including traditional full-time graduate students and, more recently, residential undergraduate students.

The graduate programs in the Naveen Jindal School of Management stress the theory and use of applied sciences for successful management and administration of private and public institutions. Courses provide an opportunity to gain integrated and detailed knowledge of the functional areas of management as well as analytical tools for effective appraisal and decision-making. Seminars and research on specific projects are designed to develop creativity and to stimulate the student toward an integrated application of the acquired knowledge.

The Naveen Jindal School of Management's mission is to meet the challenges of a rapidly changing, technology-driven, global society by partnering with the business community to:

- deliver high quality management education to a diverse group of undergraduate and graduate students and practicing executives;
• develop and continuously improve programs advancing management education and practice; and,
• conduct world-class research enhancing cutting-edge management knowledge.

Degrees Offered

• **Master of Science in Accounting** (36 hours minimum)
• **Master of Business Administration** (53 hours minimum)
• **Master of Science in Finance** (36 hours minimum)
• **Master of Science in Healthcare Management - Executive Track** (36 hours minimum)
• **Master of Science in Healthcare Management - Professional Track** (36 hours minimum)
• **Master of Science in Information Technology and Management** (36 hours minimum)
• **Master of Science in Innovation and Entrepreneurship** (36 hours minimum)
• **Master of Science in International Management Studies** (36 hours minimum)
• **Master of Science in Management and Administrative Sciences** (36 hours minimum)
• **Master of Science in Marketing** (36 hours minimum)
• **Master of Science in Supply Chain Management** (36 hours minimum)
• **Master of Science in Systems Engineering and Management** (36 hours minimum)
• **Doctor of Philosophy in International Management Studies** (75 hours minimum beyond the baccalaureate degree)
• **Doctor of Philosophy in Management Science** (75 hours minimum beyond the baccalaureate degree)

Certificates Offered

• Business Intelligence and Data Mining (Certificate)
• Enterprise Systems (Certificate)
• Healthcare Information Technology (Certificate)
• Lean 6 Sigma Green Belt in Healthcare Management (Certificate)
• Lean 6 Sigma Yellow Belt in Healthcare Management (Certificate)
• Marketing Analytics and Market Research (Certificate)
• Product Lifecycle/Supply Chain Management (Executive Certificate)
• Product Management (Certificate)
• Project Management (Executive Certificate)
• Systems Engineering (Certificate)
Faculty

Professor Emeritus: Dale Osborne

Clinical Professors: Abhijit Biswas, Larry Chasteen, David Cordell, Tevfik Dalgic, Michael Deegan, Howard Dover, Forney Fleming, Pamela Foster Brady, Randall S. Guttery, Charles Hazzard, Robert Hicks, Marilyn Kaplan, Peter Lewin, John F. McCracken, Dennis McCuistion, Radha Mookerjee, Padmakumar Nair, Joseph Picken, Divakar Rajamani, Rajiv Shah, Kenneth Smith, H. Joe Wells, Habte Woldu, Fang Wu, Laurie L. Ziegler

Clinical Associate Professors: Sonia Leach, Carolyn Reichert, Kelly Slaughter, Mark Thouin, John McClain Watson

Assistant Professors: Mehmet Ayvaci, Jianqing Chen, Emily Choi, Rebecca Files, Bernhard Ganglmair, Dorthée Honhon, Elisabeth Honka, Kyle Hyndman, Todd D. Kravet, Bin Li, Jun Li, Meng Li, Ningzhong Li, Virginie Lopez-Kidwell, Arzu Ozoguz, Alessio Saretto, Harpreet Singh, Gonca P. Soysal, Andrei Strijnev, Upender Subramanian, Yu Wang, Malcolm Wardlaw, Kelsey D. Wei, Han (John) Xia, Nir Yehuda, Yuanping Ying, Jun Zhang, Xiaofei Zhao, Yibin Zhou

Clinical Assistant Professors: Hans-Joachim Adler, Shawn Alborz, Moran Bluestein, Ayfer Gurun, Vance Lewis, Liping Ma, Ravi Narayan, Dawn Owens, Anastasia V. Shcherbakova

Senior Lecturers: Arthur M. Agulnek, Semiramis Amirpour, Frank Anderson, Mark Anderson, John Barden, Ronald Blair, Daniel Bochsler, Tiffany A. Bortz, Richard Bowen, Judd Bradbury, Monica E. Brussolo, Bobby Chang, George DeCourcy, Eugene (John) Deluke, Alexander Edsel, Amal El-Ashmawi, Carol Flannery, John Fowler, Usman A. Ghani, Mary Beth Goodrich, Maria Hasenhuttl, Julie Haworth, Jennifer G. Johnson, Lynn Carl Jones, Jackie Kimzey, Kristen Lawson, Chris Linsteadt, Diane S. McNulty, Todd Palmer, Madison Pedigo, Jared Pickens, Matt Polze, Kannan Ramanathan,
Objectives

The MS in Accounting provides a tailored educational experience that encourages (1) a globally-oriented, interdisciplinary focus, (2) a balanced conceptual and pragmatic approach, (3) development of written and oral communication skills, (4) a refinement of research and analytical skills that result in enhanced decision-making abilities, and (5) a commitment to life-long learning. Within the program, students are offered a choice of 18 graduate accounting electives. Classes are tailored towards typical career paths in areas such as corporate accounting, assurance services, taxation services and internal audit. The MS Accounting is available as on campus or an online degree program. Upon completion of the MS in Accounting, students may be eligible to sit for the Uniform CPA Examination, provided they meet the educational requirements.

The Master of Business Administration (MBA) degree provides students with a broad managerial education drawing from all business disciplines. It is obtained by completing the program course requirements of 53 hours beyond the prerequisites. UT Dallas offers several distinct approaches to obtaining an MBA. These include:

- the Cohort MBA Program, a full-time program in which students are admitted as a group each fall and take their required classes together in a fixed sequence,
- the Professional MBA Flex Program for students attending school part-time, with classes largely meeting in the evening,
- the Professional MBA Evening Cohort Program in which students are admitted as a group each fall and take their required classes together in a fixed sequence, and
- the Professional MBA Online with all core and elective courses available online.

Each of these MBA programs consists of 29 hours of required core courses and 24 hours of elective coursework, which may include an optional concentration in a selected area of business study. Courses in the Professional MBA Online use audio streaming lectures supported by downloadable presentations, online text-based conferences, bulletin board and e-mail exchanges, and teleconferences.

The MS in Finance is designed for students either with or without previous educational background in finance. At least 36 hours of management coursework beyond prerequisite courses is required, including 18 hours of basic business core courses and 18 hours of graduate finance and/or finance-related courses. Most MS Finance students will select the Financial Management option, which provides a generalist approach to the degree while allowing maximum flexibility to design a program tailored to their needs. Students can also choose one of the six concentrations: investment management, financial analysis, financial risk management, management of financial institutions, real estate finance, and financial information management.

The MS in Healthcare Management prepares students for roles in the leadership and management
of the U.S. healthcare industry. The 36 credit hour program integrates a thorough grounding in advanced business management theory and practice with an understanding of the structure, operation, and financing of the US healthcare system. The curriculum is customized to accommodate the needs of two different audiences: the Professional Track for healthcare administrators and those desiring a management career in healthcare; and the Executive Track, for physicians.

The Professional Track classes are offered on a semester-long basis in the evenings, with core business classes also offered online. Admission may be in fall, spring or summer semesters. The Executive Track is delivered in a different format, consisting of nine 4-day residential classes. A different class is offered every two months and classes may be started at any time and taken in any order. The Executive curriculum is jointly taught by faculty from the UT Dallas Naveen Jindal School of Management and the University of Texas Southwestern Medical Center.

The **MS in Information Technology and Management (MS ITM)** bridges the gap between the pure information technologist and the business professional. By providing a technology intensive program with a business focus, the program prepares graduates to apply information technology to business problems and create efficient and effective solutions. The degree requires a minimum of 36 credit hours, consisting of basic business courses, IT foundation courses, IT elective courses and free electives. The business core courses are designed to provide incoming students with the context to better appreciate and understand the complex issues that occur at the interface between IT and business. The IT foundation courses cover the essentials of IT knowledge that any student must possess. The IT elective courses provide in-depth knowledge of the technology and technology management issues. The MS ITM is available as on campus or as an online degree program. In addition, students may choose approved electives that maximize their individual educational and professional goals. The program also offers opportunities for students to concentrate in specific tracks such as 'Enterprise Systems,' 'Business Intelligence and Analytics,' 'Healthcare Systems,' 'IT Consulting,' and 'Information Security and Assurance' depending on their interests and goals.

The **MS in Innovation and Entrepreneurship (MS IE)** prepares students for successful business careers in entrepreneurial new ventures, entrepreneurial finance (venture capital/private equity), or innovation-related roles in mature organizations (product planning, product marketing, product development, etc.). This degree complements baccalaureate or advanced degrees in management, scientific or engineering disciplines, and is valued by employers in technology-related or consumer products industries.

The program provides a solid foundation in the management disciplines essential to innovation, with specific focus on the tools, techniques, and skills required to develop and lead product, service and business model innovation.

The **MS in International Management Studies (MS IMS)** degree program provides relevant knowledge and training in international management, which includes trade across national boundaries, management practices within multinational firms as well as international organizations. The program provides students the opportunity to learn in-depth the fundamentals of (1) functional areas of management, (2) international management practices and strategies, and (3) cultural, sociopolitical, and geographical constraints affecting international business decisions. The program also provides students with opportunity to learn about international business environments through
international study trips conducted in various regions of the world. The international study courses are usually offered between semesters and vary in length from two to three weeks and are generally taken as part of an Area Studies course. Many of the courses for this degree can also be taken via distance learning.

The **MS in Management and Administrative Sciences (MS MAS)** degree provides students the opportunity for specialized education in a specific management discipline built upon a core of business courses. It is obtained by completing the program course requirements of 36 hours beyond all prerequisites. The program consists of 10 hours of business core courses, and the remaining hours as elective courses. Potential concentration areas for students include: accounting, enterprise systems, internal audit, corporate finance, investments, marketing, e-commerce, information systems, operations and supply chain, real estate, innovation and entrepreneurship, organizations, organizational behavior and coaching, strategy, and international topics. The classes for this degree are largely offered in the evenings or online.

The **MS in Marketing** program prepares students seeking higher level positions in marketing and/or pursuing a graduate program to further advance their marketing knowledge. The MS in Marketing program offers five specialized tracks: advertising and branding, digital advertising and marketing, marketing analytics, product management, and a general track of marketing management. The program also offers an opportunity to obtain academic certifications in marketing analytics or product management.

The **MS in Supply Chain Management (MS SCM)** is the management of business activities from product development, sourcing, production and logistics to managing the resources and related capabilities the organization needs in the accomplishment of its strategic objectives. This 36 credit-hours program explores the key issues associated with the design and management of industrial supply chains and provide students with advanced knowledge on how to identify, resolve and manage complex operational problems. The program also introduces students to current supply chain operating practices, analysis methods, technology, applications and strategy developments. Students will acquire not only the crucial knowledge of business management but also analytical decision-making skills (especially for complex systems) along with real-life experiences gained through industry projects with area companies.

The **MS in Systems Engineering and Management (MS-SEM)** will focus on educating industry-sponsored corporate employees in the disciplines of Systems Engineering, Systems Management, Entrepreneurship & Intrapreneurship, Product Line Development and Management, and Strategic Business Management. Target industries for the program include: aerospace, defense and space systems; transportation systems; information and communications technology (ICT) systems; information assurance and cyber-security systems; healthcare systems; energy, environment and infrastructure systems; complex biological systems; and macro-economic and financial systems.

**Dual Degree, Executive MS-SEM/GLEMBA:** The Naveen Jindal School of Management and the Erik Jonsson School of Engineering and Computer Science offer a Joint Executive MS-SEM and Global Leadership Executive MBA (GLEMBA) program because today's experienced graduate students - seasoned by three or more years as workforce professionals - often seek a more comprehensive education in technical skills as well as broad-based business-leadership capabilities for the global economy. The joint-degree option provides both deep knowledge in SEM, as well as a broad
knowledge of all areas of management with an enhanced worldwide perspective of business leadership for increasing productivity, efficiency and profitability.

The joint-degree program allows students to earn a combination of an MS-SEM degree and a Global Leadership Executive MBA degree together. Separately, each degree would require 36 (MS) + 53 (MBA) credit hours, or 89 credit hours total. However, in the joint program students can earn both degrees with a smaller total of 63 to 65 semester credit hours.

The MD/MBA program is a joint effort of the school of medicine at UT Southwestern Medical Center and the Naveen Jindal School of Management. Students usually complete the first three years of the medical curriculum (all basic science courses and third-year clinical rotations) and then take a one-year leave of absence from the medical school to complete the business education. Students then return to the medical school for completion of the medical curriculum in the required fourth-year clinical clerkships and electives. At the end of the five years, the medical degree will be awarded by UT Southwestern and the MBA by UT Dallas.

The Naveen Jindal School of Management also offers Executive Education degree programs. Executive Education MBA programs are offered for students with more than five years of experience. These include (1) the Executive MBA Program with classes meeting for three to four days (Friday and two Saturdays) a month, (2) the Executive MBA with emphasis in Project Management that highlights managing complex projects, (3) the Healthcare Management Executive MBA for physicians interested in learning how to improve the leadership and management of their organizations, and (4) Global Leadership Executive MBA is delivered on campus and by distance learning with a focus on international management. Students in Executive Education programs are assessed program related fees beyond those charged to other graduate students to cover the additional costs of unique scheduling, events, and services associated with these programs. Each of these programs requires 53 credit hours to graduate.

Leaders in high tech firms often need expertise in both engineering and management. Through a unique combined master's level degree program, graduate students may earn an MSEE degree from the Jonsson School of Engineering and Computer Science in combination with an MBA, or an MS degree from the Naveen Jindal School of Management. This combined degree program is ideal for students interested in managing new technologies, from conceptualization and development to introduction and production. Students must meet the admission requirements in both schools and have an advisor in both schools. The combination of MSEE and MBA degrees can be earned by completing a minimum of 68 graduate hours, compared to 86 hours if completing the two degrees separately. The combination of MSEE and MS degrees can be earned by completing a minimum of 51 credit hours beyond prerequisites, compared to 69 hours if completing the two degrees separately. See the Combination of Engineering and Management Graduate Degrees web page for details.

The PhD in International Management Studies provides the opportunity to conduct research in the analysis of international business, emphasizing a strong foundation in theory and research in organizations and strategy. International Management Studies focuses on the analysis of organizations, industries and markets as interdependent systems, stressing structural, strategic, environmental and international considerations and their implications for management. Topics such as corporate strategy, international business, multinational management, organization design and
change, technological and industrial development, and managerial decision-making are examined using management theories and empirical methods.

The **PhD in Management Science** provides the opportunity to conduct research in a functional business area to contribute to the knowledge in that field with respect to its intellectual content or professional practice. The Naveen Jindal School of Management defines Management Science as the use of economics, behavioral science, mathematics and statistics to conduct rigorous scientific research. It encompasses both theory and empirical analysis. Management Science embraces areas of specialization like marketing, finance, accounting, organizational behavior, management strategy and public policy, and decision sciences. It has no clear boundaries among the various areas, places emphasis on science, and is not constrained by the culture of individual disciplines. It is the underlying orientation of science and integration that distinguishes Management Science from other philosophies and approaches to the study of management.

Both doctoral programs offer preparation for academic and/or research positions in universities, with organizations such as the World Bank, and in industry, both in the United States and in other countries.

**Facilities**

The Naveen Jindal School of Management’s 200,000 square foot (approximate) building opened in the Fall of 2003. The three wings, arranged around a courtyard, provide classrooms, meeting rooms, office space and state-of-the-art wireless access to the internet throughout the facility.

**Admission Requirements to Master’s Programs**

Please visit the university's [general admission criteria](https://catalog.utdallas.edu/2013/graduate/programs/jsom) for the graduate programs. The following factors are considered in arriving at an admission decision:

- A bachelor's degree from an accredited institution in the United States, or its equivalent, as determined by the Dean of Graduate Studies,
- International applicants must submit a TOEFL score of at least 80 on the internet based test that is less than two years old,
- Personal essay outlining academic interests and goals,
- Three letters of recommendation,
- Resume, and
- Competitive GMAT (GRE also accepted) performance based on a score that is less than five years old.

Applications are due in the Admissions Office 90 days prior to registration for international students and 45 days prior to registration for all other students. Students are admitted three times per year and can start their studies during any one of the three semesters.

Students may apply for the Dean's Excellence Scholarship, which provides financial support in the form of scholarships.
Admission Requirements to Full-time (Cohort) MBA program: In addition to the factors required for admission to the evening programs, admission to the Full-time, Cohort MBA program requires the capability to perform well in a fast-paced, team-oriented curriculum. Applicants are admitted based on a composite evaluation of the submitted measures of performance which include the GMAT, GPA, recommendation letters, and work experience, as well as initiative and interest suggested through essays. The Admission Committee seeks academic and professional excellence. Applications completed by March 1 will be considered for financial support. International applications are due May 1 and domestic applications by July 1. Students are admitted each fall.

Admission Requirements to Executive MBA programs: Admissions are based on academic transcripts, a personal essay, letters of recommendation, and knowledge of elementary calculus and basic financial accounting. Also, approximately 10 years of business experience with relevant managerial experience. The GMAT is encouraged, but not required.

Admission Requirements to Master of Science in Healthcare Management for physicians (admission to the Executive Track) requires an MD or DO degree from an accredited school of medicine or school of osteopathy, a copy of a current unrestricted license to practice medicine in the U.S. and a medical school transcript.

Admission Requirements to Non-Degree Seeking Students: Students may be admitted as non-degree seeking students. To be admitted as a non-degree seeking student, students will have to meet all the admission requirements specified for degree seeking students including relevant test scores (GMAT/GRE, TOEFL). Students who want to switch to degree-seeking status, will have to apply to the degree program. If they are admitted, at most six credits taken as a non-degree seeking student can be transferred to the degree program.

Substitutions and Transfers of Credit

Substitutions of program requirements may be granted in recognition of previous coursework taken in a specific business program area. Substitutions are approved by the appropriate Program Director through a process which allows a student to skip a core course and take the next higher level course in that area with no reduction in the overall program hour requirements.

Transfers of credit may be granted for equivalent graduate coursework taken at other universities with a grade of "B" or better within the past six years. The appropriate Program Director initiates such transfers, which must be approved by the Dean of Graduate Studies. The total number of transfers of credit toward the completion of a master's degree cannot exceed nine hours toward the MS degree, and twelve hours toward the MBA degree.

Applications for approval of substitutions and transfers of credit may be obtained in and submitted to the Naveen Jindal School of Management Advising Office.

Prerequisites for Graduate Programs

Knowledge of calculus is a requirement for certain programs (see individual programs for details). Students who have not completed an undergraduate calculus course at the level of MATH 1325 Applied Calculus I or higher may satisfy the prerequisite by completing MATH 5304 Applied Mathematical Analysis for Non-Majors. Degree credit is not earned for program prerequisites;
however, the grade achieved in MATH 5304 will count toward the student's grade point average. For the MS in International Management Studies, FIN 6301 Financial Management has a prerequisite of OPRE 6301, its equivalent or consent of instructor. Prerequisites must be satisfied within the first twelve hours of graduate study as a degree-seeking student.
