Certificate in Biomedical Sciences

The post-baccalaureate Certificate in Biomedical Sciences (CBioMed), administered by the School of Natural Sciences and Mathematics, allows students who have already earned a bachelor’s degree to further develop their scientific knowledge in preparation for application to schools of medicine, dentistry, or podiatry. A rigorous curriculum provides students with the opportunity to focus on content mastery. Program requirements also include clinical, community service, and/or research hours, independent from course credit and initiated by the student. Certificate students access the services of the Health Professions Advising Center (HPAC), receiving assistance with the application process.

Application for the program is through the ApplyTexas online application at www.utdallas.edu/admissions. Applicants apply as "Transfer, Undergraduate" students in the School of Natural Sciences and Mathematics, and select the "Undergraduate Certificate in Biomedical Sciences." A supplemental application, as well as the booklet "Information and Program Guidelines," can be found on the Health Professions Advising Center (HPAC) webpage. The CBioMed program is administered through HPAC.
