Neuroscience (BS)

Neuroscience is the multidisciplinary study of brain function that draws on recent advances in cell and molecular biology, biochemistry, biophysics, and computer and behavioral and cognitive sciences. It examines the brain's global and nanoscale biochemistry, its complex and extensively networked anatomical structure, and its remarkably adaptive physiology. The field considers neuronal development from early embryology through advanced senescence, and examines the brain's plasticity from the level of single proteins, of individual neurons, up through the level of networks or systems of cells, on up to complete behaving organisms. It studies the regulation and expression of behavior, the impact of that behavior on the brain, and the complex interactions of multiple neuronal systems that underlie the emergence of cognitive function. The Neuroscience program at UT Dallas provides students with the opportunity to focus on the brain from a systems-level perspective, drawing on behavioral and cognitive expertise combined with cellular and molecular analyses. It allows undergraduates extensive interactions with working neuroscientists who use the latest experimental techniques.

The Neuroscience program is designed to prepare students for admission to graduate, medical, or dental school, or for careers in related biomedical research, industry, and allied health science fields. Required courses and guided electives can include the approved pre-medical curriculum and offer an alternative to other traditional pre-health majors. Students who wish to continue their education in the fields of medicine, dentistry or allied professional areas should register with the Health Professions Advising Center during their first semester. Students are encouraged to design a personalized degree plan of guided electives with their advisor that combines courses from the neurosciences and related disciplines of mathematics, physics, chemistry, biology, engineering, computer science, psychology, and speech pathology and audiology in a way that will suit their individual interests and goals. Students are also strongly encouraged to gain research experience as part of their undergraduate training in Neuroscience.

Students can complete Core Curriculum and Neuroscience major requirements in a minimum of 85 semester credit hours, leaving 35 elective semester hours. Students can complete Core Curriculum, Neuroscience major, and pre-health Professions requirements in a minimum of 111 semester credit hours, leaving 9 remaining elective semester credit hours.

Bachelor of Science in Neuroscience

Degree Requirements (120 semester credit hours)

I. Core Curriculum Requirements: 42 semester credit hours

Communication: 6 semester credit hours
COMM 1311 Survey of Oral and Technology-based Communication
RHET 1302 Rhetoric

Mathematics: 3 semester credit hours

One of the following:

- MATH 2414 Integral Calculus
- MATH 2417 Calculus I

Life and Physical Sciences: 6 semester credit hours

- CHEM 1311 General Chemistry I
- BIOL 2311 Introduction to Modern Biology I

Language, Philosophy and Culture: 3 semester credit hours

One of the following:

- HUMA 1301 Exploration of the Humanities
- LIT 2331 Masterpieces of World Literature
- PHIL 1301 Introduction to Philosophy
- PHIL 2316 History of Philosophy I
- PHIL 2317 History of Philosophy II

Creative Arts: 3 semester credit hours

One of the following:

- AHST 1303 Survey of Western Art History: Ancient to Medieval
- AHST 1304 Survey of Western Art History: Renaissance to Modern
- AHST 2331 Understanding Art
- ARTS 1301 Exploration of the Arts
- DANC 1310 Understanding Dance
- DRAM 1310 Understanding Theater
- FILM 2332 Understanding Film
- MUSI 1306 Understanding Music

American History: 6 semester credit hours
Two of the following:

- **HIST 1301** U.S. History Survey to Civil War
- **HIST 1302** U.S. History Survey from Civil War
- **HIST 2301** History of Texas
- **HIST 2330** Themes and Ideas in American History
- **HIST 2332** Civil War and Reconstruction

**Government / Political Science: 6 semester credit hours**

- **GOVT 2305** American National Government
- **GOVT 2306** State and Local Government

**Social and Behavioral Sciences: 3 semester credit hours**

- **PSY 2301** Introduction to Psychology

**Component Area Option: 6 semester credit hours**

- **PSY 2317** Statistics for Psychology
  - or **STAT 1342** Statistical Decision Making

AND

- **CHEM 1312** General Chemistry II

II. Major Requirements: 45 semester credit hours

**Major Preparatory Courses: 24 semester credit hours - 6 semester credit hours beyond Core Curriculum**

All of the following:

- **BIOI 2111** Introduction to Modern Biology Workshop I
- **BIOI 2281** Introductory Biology Laboratory
- **BIOI 2311** Introduction to Modern Biology I
- **CHEM 1111** General Chemistry Laboratory I
- **CHEM 1311** General Chemistry I
- **CHEM 1112** General Chemistry Laboratory II
- **CHEM 1312** General Chemistry II
- **MATH 2414** Integral Calculus
  - or **MATH 2417** Calculus

PSY 2301 Introduction to Psychology^3
PSY 2317 Statistics for Psychology^3
or STAT 1342 Statistical Decision Making^3

Major Core Courses: 24 semester credit hours

All of the following:

NSC 3361 Behavioral Neuroscience
NSC 4352 Cellular Neuroscience
NSC 4353 Neuroscience Laboratory Methods
NSC 4354 Integrative Neuroscience
NSC 4356 Neurophysiology
NSC 4363 Neuropharmacology
NSC 4366 Neuroanatomy

And one emphasis course from the following six:

NSC 4357 Neurobiology of Learning and Memory
or NSC 4367 Developmental Neurobiology
or NSC 4371 Neural Plasticity
or NSC 4373 Sensory Neuroscience
or NSC 4362 Molecular Neuroscience
or NSC 4385 Neuropsychology

Major Related Courses: 15 semester credit hours

Guided Electives: 15 semester credit hours from the following list (the Emphasis Course selected above will not count twice as a Guided Elective). Consultation with an advisor is required.

BIOL 3101 Classical and Molecular Genetics Workshop
BIOL 3301 Classical and Molecular Genetics
BIOL 3102 Eukaryotic Molecular and Cell Biology Workshop
BIOL 3302 Eukaryotic Molecular and Cell Biology
BIOL 3161 Biochemistry Workshop I
BIOL 3361 Biochemistry I
BIOL 3162 Biochemistry Workshop II
BIOL 3362 Biochemistry II
BIOL 3455 Human Anatomy and Physiology with Lab I

III. Elective Requirements: 33 semester credit hours

Free Electives: 33 semester credit hours

At least 33 semester credit hours of lower- or upper-division courses of the student's choice. Students are encouraged to explore areas of concentration in Neuroscience as well as explore interests outside the field. Be aware that at least 51 semester credit hours of upper-division courses are required for graduation.

Pre-medical and/or other pre-health professions students (29 semester credit hours)

Students seeking to complete Pre-health Professions requirements should take the following as free electives:

Required pre-medical courses (12 semester credit hours)

- **BIOL 2112** Introduction to Modern Biology II Workshop
- **BIOL 2312** Introduction to Modern Biology II
- **CHEM 2123** Introductory Organic Chemistry Laboratory I
- **CHEM 2125** Introductory Organic Chemistry Laboratory II
- **CHEM 2323** Introductory Organic Chemistry I
- **CHEM 2325** Introductory Organic Chemistry II

Pre-med Advanced Biology requirement (8 semester credit hours, select 2 courses)

- **BIOL 3101** Classic and Molecular Genetics Workshop
- **BIOL 3301** Classic and Molecular Genetics
- **BIOL 3102** Eukaryotic Molecular and Cell Biology Workshop
- **BIOL 3302** Eukaryotic Molecular and Cell Biology
- **BIOL 3161** Biochemistry Workshop I
- **BIOL 3361** Biochemistry I
- **BIOL 3162** Biochemistry Workshop II
- **BIOL 3362** Biochemistry II

Pre-med Physics requirement (8 semester credit hours, select 2 courses)
**Fast Track Baccalaureate/Master's Degrees**

UT Dallas undergraduate students with strong academic records who intend to pursue a master's degree in Applied Cognition and Neuroscience at UT Dallas may consider an accelerated undergraduate-graduate plan of study. When accepted into the program, students may take up to 15 semester credit hours of graduate courses that may be used to complete the baccalaureate degree and also satisfy requirements for the master's degree. Students must maintain a 3.000 grade point average and earn grades of B or better in graduate courses taken. Students must have completed at least 90 semester credit hours toward a baccalaureate degree before beginning Fast Track coursework. Students should apply to admissions one semester before they reach 90 semester credit hours. To qualify for application, undergraduate students must have completed at least 18 semester credit hours in major core courses at UT Dallas. Apply to the Fast Track program through the Applied Cognition and Neuroscience Program Office. Students should consult with a graduate advisor regarding admissions criteria and plans of study.

1. Incoming freshmen must complete and pass UNIV 1010 Freshman Seminar and the corresponding school-related freshman seminar course. Students, including transfer students, who complete their core curriculum at UT Dallas must take UNIV 2020.

2. Curriculum Requirements can be fulfilled by other approved courses from accredited institutions of higher education. The courses listed are recommended as the most efficient way to satisfy both Core Curriculum and Major Requirements at UT Dallas.

3. A required preparatory course that also fulfills a Core Curriculum requirement. Eighteen (18) semester credit hours are counted in Core Curriculum.

4. May be repeated for credit, up to 9 semester credit hours.

5. May be repeated for credit, up to 6 semester credit hours.

6. Algebra-based Physics courses

7. Calculus-based Physics courses
