Erik Jonsson School of Engineering & Computer Science

Department of Materials Science and Engineering

Objectives

The objective of the Master of Science (MS) degree in materials science and engineering is to provide intensive preparation for the professional practice in modern materials science by those engineers and scientists who wish to continue their education. Courses are offered at times and locations convenient for the student who is employed on a full-time basis.

The objective of the Doctor of Philosophy (PhD) program in materials science and engineering is to prepare individuals to perform original, cutting-edge research in materials science, particularly in the areas of nano-structured materials, electronics, optical and magnetic materials, bio-mimetic materials, polymeric materials, MEMS materials and systems, organic electronics, and advanced processing of modern materials.

Scholarship Opportunities

The Erik Jonsson School of Engineering and Computer Science offers competitive scholarship awards for very well qualified students. Interested students should request application materials by contacting the Department of Materials Science and Engineering.

Master of Science in Materials Science and Engineering

33 semester credit hours minimum

Department Faculty

Professors: Orlando Auciello, Yves J. Chabal, Kyeongjae (KJ) Cho, Massimo V. Fischetti, Bruce E. Gnade, Julia W. P. Hsu, Jiyoung Kim, Moon J. Kim, Robert M. Wallace

Professor Emeritus: Don Shaw

Associate Professors: Lev D. Gelb, Manuel Quevedo-Lopez, Amy V. Walker

Assistant Professors: Christopher L. Hinkle, Walter E. Voit, Chadwin D. Young

UT Dallas Affiliated Faculty: Kenneth J. Balkus Jr., Ray H. Baughman, Julia Chan, Wonjae Choi, Ann (Catrina) Coleman, James J. Coleman, John P. Ferraris, Matthew J. Goeckner, Fatemeh Hassanipour,
Admission Requirements

The University's general admission requirements are discussed on the [Graduate Admission page](catalog.utdallas.edu/2015/graduate/admission).

A student lacking undergraduate prerequisites for graduate courses in Materials Science and Engineering (MSEN) must complete these prerequisites or receive approval from the graduate advisor and the course instructor. A diagnostic exam may be required. Specific admission requirements are as follows:

- Student has met standards equivalent to those currently required for admission to the PhD or master's degree programs in Materials Science, Electrical Engineering, Chemistry, Physics, or Biology.
- A grade point average (GPA) in undergraduate-level coursework of 3.5 or better on a 4.0 point scale.
- GRE revised scores which are recommended as 154 or above, 154 or above, and 4 for the verbal, quantitative, and analytical writing components, respectively, are advisable based on our experience with student success in the program.

Students, who fulfill only some of the above requirements, if admitted conditionally, will be required to take graduate level courses as needed to make up any deficiencies.

Degree Requirements

The University's general degree requirements are discussed on the [Graduate Policies and Procedures page](catalog.utdallas.edu/2015/graduate/policies/policy).

The MSEN MS degree requires a minimum of 33 semester credit hours.

All students must have an academic advisor and an approved degree plan. These are based upon the student's choice of concentration. Courses taken without advisor approval will not count toward the 33 semester credit hour requirement. Successful completion of the approved course of studies leads to the MS degree.

MS students undertaking the non-thesis option must complete at least 33 semester credit hours of coursework with a grade of B or better.

MS students undertaking the thesis option must carry out a research project under the direction of a faculty or affiliated faculty in Materials Science and Engineering, and complete and defend a thesis on the research project, but they need only complete the four core courses and 9 semester
credit hours of advanced coursework. A Supervisory Committee will be appointed once the faculty member accepts the student for a research project. The rules for the thesis defense are specified by the Office of the Dean of Graduate Studies.

Students must obtain a grade of B- or better in each of the following core classes and maintain an average core class GPA of at least 3.0 to remain in good standing and satisfy their degree requirements:

- **MSEN 5310** Thermodynamics of Materials
- **MSEN 5360** Materials Characterization
- **MSEN 6319** Quantum Mechanics for Materials Scientists
- **MSEN 6324 (EEMF 6324)** Electronic, Optical and Magnetic Materials

Note: the presence of a course number in parentheses indicates that this course is cross-listed in another department.

A minimum of 9 semester credit hours of advanced coursework is required, from the following list:

- **MSEN 5340 (CHEM 5340)** Advanced Polymer Science and Engineering
- **MSEN 5361** Fundamentals of Surface and Thin Film Analysis
- **MSEN 5370** Ceramics and Metals
- **MSEN 5375** Electronic Devices Based On Organic Solids
- **MSEN 5377 (PHYS 5377)** Computational Physics of Nanomaterials
- **MSEN 6310 (MECH 6367)** Mechanical Properties of Materials
- **MSEN 6320 (EEMF 6320)** Fundamentals of Semiconductor Devices
- **MSEN 6327 (EEMF 6327)** Semiconductor Device Characterization
- **MSEN 6330** Phase Transformations
- **MSEN 6339** Nanostructured Materials: Synthesis, Properties and Applications
- **MSEN 6340** Advanced Electron Microscopy
- **MSEN 6350** Imperfections in Solids
- **MSEN 6362** Diffraction Science

These courses are intended to provide greater depth and advanced training in areas broadly relevant to Materials Science and Engineering research.

The remaining semester credit hours may be taken from the following list of elective courses (or other electives which have been approved by the student's thesis advisor or the graduate director as appropriate):

Doctor of Philosophy in Materials Science and Engineering

75 semester credit hours minimum beyond the baccalaureate degree

Department Faculty

Professors: Orlando Auciello, Yves J. Chabal, Kyeongjae (KJ) Cho, Massimo V. Fischetti, Bruce E. Gnade, Julia W. P. Hsu, Jiyoung Kim, Moon J. Kim, Robert M. Wallace

Professor Emeritus: Don Shaw

Associate Professors: Lev D. Gelb, Manuel Quevedo-Lopez, Amy V. Walker

Assistant Professors: Christopher L. Hinkle, Walter E. Voit, Chadwin D. Young

Adjunct Faculty: Shela Aboud, Husam Al-Shareef, Luigi Colombo, Matthew Halls, Dale Huber, Steven Mick, Sriram Muthukumar, Carlos A. Paz de Araujo, Bhabendra Pradahn, Ecatherina Roodenko, Bin Shan, Eric Vogel, Weichao Wang, Ka Xiong

Admission Requirements

The University's general admission requirement are discussed on the Graduate Admission page (catalog.utdallas.edu/2015/graduate/admission).

A student lacking undergraduate prerequisites for graduate courses in Materials Science and Engineering (MSEN) must complete these prerequisites or receive approval from the graduate advisor and the course instructor.

A diagnostic exam may be required. Specific admission requirements follow.

- Student has met standards equivalent to those currently required for admission to the PhD or master's degree programs in Materials Science, Electrical Engineering, Chemistry, Physics, or Biology.
- A grade point average (GPA) in undergraduate-level coursework of 3.5 or better on a 4.0 point scale
GRE revised scores which are recommended as 154 or above, 154 or above, and 4 for the verbal, quantitative, and analytical writing components, respectively, are advisable based on our experience with student success in the program.

Students who fulfill some of the above requirements, if admitted conditionally, will be required to take graduate level courses as needed to make up any deficiencies.

Degree Requirements

The University’s general degree requirements are discussed on the Graduate Policies and Procedures page (catalog.utdallas.edu/2015/graduate/policies/policy).

The MSEN PhD requires a minimum of 75 semester credit hours beyond the baccalaureate degree. These credits must include at least 30 semester credit hours of graduate-level coursework in MSEN.

All students must have an academic advisor and an approved degree plan. Courses taken without advisor approval will not count toward the 75 semester credit hour requirement.

Each doctoral student must carry out original research in the area of Materials Science and Engineering, under the direction of a faculty or affiliated faculty of Materials Science and Engineering, and complete and defend a dissertation on the research project. A Supervisory Committee will be appointed once the faculty member accepts the student for a research project.

Students must be admitted to doctoral candidacy by passing a Qualifying Exam, which will be administered near the time that the students have completed their coursework. Upon passing the Qualifying Exam, students must present and defend a Research Proposal with their Supervisory Committee within approximately nine months or sooner after passing the Qualifying Exam. The rules for the dissertation research and defense are specified by the Office of the Dean of Graduate Studies.

Students must obtain a grade of B- or better in each of the following core classes and maintain an average core class GPA of at least 3.0 to remain in good standing and satisfy their degree requirements:

- **MSEN 5310** Thermodynamics of Materials
- **MSEN 5360** Materials Characterization
- **MSEN 6319** Quantum Mechanics for Materials Scientists
- **MSEN 6324** (EEMF 6324) Electronic, Optical and Magnetic Materials

Note: the presence of a course number in parentheses indicates that this course is cross-listed in another department.

A student may petition for waiver of core courses based on prior coursework of equivalent scope and level, and if the Department finds that the student has already mastered the course
material, the student may replace that core course with elective courses for up to a total of twelve semester credit hours.

A minimum of 9 semester credit hours of advanced coursework is required, from the following list:

- **MSEN 5340** (CHEM 5340) Advanced Polymer Science and Engineering
- **MSEN 5361** Fundamentals of Surface and Thin Film Analysis
- **MSEN 5370** Ceramics and Metals
- **MSEN 5375** Electronic Devices Based On Organic Solids
- **MSEN 5377** (PHYS 5377) Computational Physics of Nanomaterials
- **MSEN 6310** (MECH 6367) Mechanical Properties of Materials
- **MSEN 6320** (EEMF 6320) Fundamentals of Semiconductor Devices
- **MSEN 6327** (EEMF 6327) Semiconductor Device Characterization
- **MSEN 6330** Phase Transformations
- **MSEN 6339** Nanostructured Materials: Synthesis, Properties and Applications
- **MSEN 6340** Advanced Electron Microscopy
- **MSEN 6350** Imperfections in Solids
- **MSEN 6362** Diffraction Science

These courses are intended to provide greater depth and advanced training in areas broadly relevant to Materials Science and Engineering research.

Any remaining semester credit hours of coursework may be taken from the following list of elective courses (or other electives which have been approved by the student's thesis advisor):

- **MSEN 5300** (PHYS 5376) Introduction to Materials Science
- **MSEN 5320** Materials Science for Sustainable Energy
- **MSEN 5331** (CHEM 5331) Advanced Organic Chemistry I
- **MSEN 5333** (CHEM 5333) Advanced Organic Chemistry II
- **MSEN 5341** (CHEM 5341) Advanced Inorganic Chemistry I
- **MSEN 5344** Thermal Analysis
- **MSEN 5353** Integrated Circuit Packaging
- **MSEN 5355** (CHEM 5355) Analytical Techniques I
- **MSEN 5356** (CHEM 5356) Analytical Techniques II
- **MSEN 5371** (PHYS 5371) Solid State Physics
Description of Facilities Available for Conducting Research

An extensive array of the materials characterization, synthesis, and processing tools exist in the department for student use in research. Characterization capabilities include advanced high-resolution electron microscopy, x-ray diffraction, a large variety of surface analysis methods, and electrical characterization. Thin film deposition methods include atomic layer deposition, sputter deposition, thermal deposition, molecular beam epitaxy, chemical vapor deposition, pulsed laser deposition, and gas phase adsorption. Fabrication methods can be accomplished in the Cleanroom Research Laboratory as well (www.utdallas.edu/research/cleanroom). Computational modeling
activities include studies from the atomistic to the macroscopic level. Details of the capabilities and faculty research can be obtained at: mse.utdallas.edu.
