Naveen Jindal School of Management

Master of Science in Systems Engineering and Management (MS-SEM)

36 semester credit hours minimum

Faculty

Clinical Professors: Abhijit Biswas, Howard Dover, Peter Lewin, Rajiv Shah, Laurie L. Ziegler

Associate Professors: Nina Baranchuk, Norris Bruce, Robert L. Kieschnick Jr., Nanda Kumar, Ashutosh Prasad, Orlando C. Richard, David J. Springate, Yexiao Xu, Alejandro Zentner

Clinical Associate Professor: Carolyn Reichert

Assistant Professors: Bernhard Ganglmair, Arzu Ozoguz, Malcolm Wardlaw

Clinical Assistant Professor: Ayfer Gurun

Senior Lecturers: Carol Flannery, Maria Hasenhuttl, Jeffery (Jeff) Hicks, Avanti P. Sethi, James Szot

Degree Requirements

The MS-SEM program is designed to be flexible to accommodate different student backgrounds, allowing students to pick up areas in which they are deficient, while still guaranteeing core competency in systems engineering and systems management. This program has both a thesis and a non-thesis option. All part-time MS-SEM students will be assigned initially to the non-thesis option. Those wishing to elect the thesis option may do so by obtaining the approval of a faculty thesis supervisor.

The MS-SEM degree requires a total of 36 semester credit hours consisting of 12 courses in the non-thesis option or 10 courses plus six semester credit hours of thesis credit for the thesis option. All students must have an academic advisor and an approved degree plan. Courses taken without advisor approval will not count toward the 36 semester credit hour requirement. Successful completion of the approved course of studies leads to the MS-SEM degree. Please also note that the University's general degree requirements are discussed elsewhere in the graduate catalog.

Non-Thesis Option

Completion of a minimum of 36 semester credit hours of graduate level lecture courses including
the required core courses. With advisor approval, these may include some 5000 level courses. Students must earn a grade of "B" or better in each of four core courses (see Course Requirements).

**Thesis Option**

An alternative to 36 semester credit hours required for the MS-SEM degree, would be the completion of a minimum of 30 semester credit hours of graduate level lecture courses, with a grade of "B" or better in each of the required core courses (see Course Requirements), six semester credit hours of a combination of Master's research (SYSM 6V70) and thesis (SYSM 6V90), submitted to the graduate school, and a formal public defense of the thesis.

Students enrolled in the thesis option should meet with individual faculty members to discuss research opportunities and to choose a research advisor during the first or second semester that the student is enrolled. After the second semester of study, course selection should be made in consultation with the research advisor. Part-time students are encouraged to enroll in only one course during their first semester and in no more than two courses during any semester they are also working full-time.

Research and thesis semester credit hours cannot be counted in an MS-SEM degree plan unless a thesis is written and successfully defended. A supervising committee, which must be chosen in consultation with the student's thesis advisor prior to enrolling for thesis credit, administers the defense. With advisor approval, the lecture courses may include some 5000 level courses. Full-time students at UT Dallas who receive financial assistance are required to enroll in nine semester credit hours each semester.

**Course Requirements**

**Core Courses:** 12 semester credit hours

Students are required to take four courses (a total of 12 semester credit hours) from a set of eight courses from the lists below. Two of the courses must be from the Engineering Core section and two from the Management Core section. The four required courses contribute a total of 12 semester credit hours toward the MS degree.

**Engineering Core Courses**

- **SYSM 6301** Systems Engineering, Architecture and Design
- **SYSM 6302** Dynamics of Complex Networks and Systems
- **SYSM 6303** Quantitative Introduction to Risk and Uncertainty in Business
- **SYSM 6305** Optimization Theory and Practice

**Management Core Courses**

- **SYSM 6311** Systems Project Management in Engineering and Operations
Prescribed Elective Courses: 12 semester credit hours

Students are required to take an additional four courses (a total of 12 semester credit hours) from the set of eight core courses listed above and/or the set of courses listed below. Two of these courses must be chosen from the two Engineering sections (core and elective), and two from the two Management sections (core and elective). Because a program objective is to maintain a high degree of flexibility, students are encouraged to work with an MS-SEM program advisor to discuss possible (limited) exceptions and substitutions for the prescribed elective courses.

Engineering Elective Courses

- **SYSM 6304** Risk and Decision Analysis
- **SYSM 6306** Engineering Systems: Modeling and Simulation
- **SYSM 6307** Linear Systems
- **SYSM 6308** Software Maintenance, Evolution, and Re-Engineering
- **SYSM 6309** Advanced Requirements Engineering
- **SYSM 6310** Software Testing, Validation and Verification
- **SYSM 6321** Financial Engineering I
- **SYSM 6325** Requirements Development and Integration for Complex Systems

Management Elective Courses

- **SYSM 6313** Systems Negotiation and Dispute Resolution
- **SYSM 6315** The Entrepreneurial Experience
- **SYSM 6316** Managing Innovation within the Corporation
- **SYSM 6317** The Management of High Tech Products
- **SYSM 6319** Business Economics
- **SYSM 6320** Strategic Leadership
- **SYSM 6332** Technology and New Product Development
- **SYSM 6334** Systems Operations Management

Free Elective Courses: 12 semester credit hours
Working with an MS-SEM program advisor, students are required to take four additional and distinct courses either from the remaining SYSM courses listed above or from other courses offered in management or engineering that form a "concentration" or "specialization" in systems related, possibly industry-specific sectors.

The concentration area consists of four courses (12 semester credit hours) in the degree program; examples include: Control and Mechatronic Systems, Cybersecurity and Information Assurance, Energy and Infrastructure Systems, Enterprise and Data Management Systems, Entrepreneurship and Innovation Management, Global Supply Chain Management, Healthcare and Biomedical Systems, Optimization and Operations Research, Telecom, IT and Multimedia Networks, and Transportation Systems. Finally, because of the flexible nature of the MS-SEM degree program, students may submit for approval a "personalized" concentration area that focuses on aspects of systems engineering, and may combine elements of other concentration areas on a focused theme.

**SEM Graduate Certificates**

Each certificate requires 12 semester credit hours. The courses are offered in an Executive Education (4 semester credit hour module format).

**Graduate Certificate in Systems Engineering**

*12 semester credit hours*

**Faculty**

**Professors:** Gregory G. Dess, Duncan L. MacFarlane, Mike W. Peng, Mark W. Spong, Lakshman Tamil, Mathukumalli Vidyasagar, W. Eric Wong, Steve Yurkovich

**Clinical Professors:** Abhijit Biswas, Peter Lewin

**Associate Professors:** Lawrence Chung, Robert L. Kieschnick Jr., David J. Springate

**Clinical Associate Professor:** Carolyn Reichert

**Senior Lecturers:** Jeffery (Jeff) Hicks, Nhut Nguyen, Janell Straach, James Szot

**Requirements**

The graduate certificate in systems engineering requires students to complete over the period of one academic year two courses from the set of engineering courses listed below, and any two additional courses from the remainder of the 20 SYSM prefix courses listed below in either group, engineering or management.

**Systems Engineering Courses**

- **SYSM 6301** Systems Engineering, Architecture and Design
- **SYSM 6302** Dynamics of Complex Networks and Systems
SYSM 6303 Quantitative Introduction to Risk and Uncertainty in Business
SYSM 6304 Risk and Decision Analysis
SYSM 6305 Optimization Theory and Practice
SYSM 6306 Engineering Systems: Modeling and Simulation
SYSM 6307 Linear Systems
SYSM 6308 Software Maintenance, Evolution, and Re-Engineering
SYSM 6309 Advanced Requirements Engineering
SYSM 6310 Software Testing, Validation and Verification
SYSM 6321 Financial Engineering I
SYSM 6325 Requirements Development and Integration for Complex Systems

Graduate Certificate in Systems Management
12 semester credit hours

Faculty

Professors: Gregory G. Dess, Duncan L. MacFarlane, Mike W. Peng, Mark W. Spong, Lakshman Tamil, Mathukumalli Vidyasagar, W. Eric Wong, Steve Yurkovich

Clinical Professors: Abhijit Biswas, Peter Lewin

Associate Professors: Lawrence Chung, Robert L. Kieschnick Jr., David J. Springate

Clinical Associate Professor: Carolyn Reichert

Senior Lecturers: Jeffery (Jeff) Hicks, Nhut Nguyen, Janell Straach, James Szot

Requirements

The graduate certificate in systems management requires students to complete over the period of one academic year two courses from the set of management courses listed below, and any two additional courses from the remainder of the 20 SYSM-prefix courses listed in either group, engineering or management.

Systems Management Courses

SYSM 6311 Systems Project Management in Engineering and Operations
SYSM 6312 Systems Financial Management
SYSM 6313 Systems Negotiation and Dispute Resolution
Graduate Certificate in Cybersecurity Systems

12 semester credit hours

Faculty

Professors: Yvo G. Desmedt, Latifur Khan, Bhavani Thuraisingham

Associate Professors: Kevin Hamlen, Murat Kantarcioğlu

Assistant Professors: Alvaro Cárdenas, Zhiqiang Lin

Senior Lecturer: Ebru Cankaya

Requirements

The graduate certificate in Cybersecurity Systems Certificate (CCSS) is offered by the Erik Jonsson School of Engineering and Computer Science and Jindal School of Management. The CCSS may be combined with other courses and/or certificates toward an MS degree, such as Computer Science, Information Technology and Management, or Systems Engineering and Management, provided that the student has gained admission into that particular program.

To earn the certificate, students in the program must take four courses with an overall GPA of 3.0.

Required Course (3 semester credit hours)

MIS 6311 Cybersecurity Fundamentals

Track #1: Computer Science (CS) Emphasis (9 semester credit hours)

Students can choose three courses from the following:
CS 6324 Information Security
CS 6349 Network Security
CS 6348 Data and Applications Security

Or a course from a list of existing cybersecurity systems in Computer Science courses (offered periodically, and must be approved)

Track #2: Internal Audit, Information Management (IA/IM) Emphasis (9 semester credit hours)

Students must take MIS 6330 and ACCT 6336, and choose between ACCT 6380 or MIS 6363:

- MIS 6330 Information Technology Security
- ACCT 6336 Information Technology Audit and Risk Management
- ACCT 6380 Internal Audit or MIS 6363 Cloud Computing

Track #3: Systems Engineering and Management Emphasis (9 semester credit hours)

Students must take SYSM 6301, and choose between CS 6324 or MIS 6330:

- SYSM 6301 Systems Engineering, Architecture and Design
- CS 6324 Information Security or MIS 6330 Information Technology Security

Students can choose at least one course from each of the CS and IA/IM tracks from the following:

- CS 6348 Data and Applications Security (CS track)
- CS 6349 Network Security (CS track)
- MIS 6363 Cloud Computing (CS track)
- ACCT 6336 Information Technology Audit and Risk Management (IA/IM track)
- ACCT 6380 Internal Audit (IA/IM track)
