

CHEM2130 - Introductory Organic Chemistry for Medical Science Laboratory

[CHEM 2130](#) Introductory Organic Chemistry for Medical Science Laboratory (1 semester credit hour) The experimental skills associated with organic functional group reactions. Topics covered include fundamental skills, as well as selected experiments developed in a traditional two-semester Introductory Organic Chemistry Laboratory sequence ([CHEM 2123](#) and [CHEM 2125](#)). Required course for students in the Partnership in Advancing Clinical Transition (UT-PACT) Program. May not be used to fulfill degree requirements for pre-health majors. Corequisite: [CHEM 2330](#) and instructor consent required. (0-4) Y
