BUAN6345 - High Performance Analytics

BUAN 6345 (MIS 6345) High Performance Analytics (3 semester credit hours) This course provides students with in-depth knowledge of SAN HANA implementation modeling techniques and SAP data services. The course covers HANA architecture, graphic and SQL modeling tools in SAP HANA using text search and analysis, managing modeling content, security and authorizations, and using data services to bring data into SAP HANA as well as non-SAP, data warehouse concepts and sources. Students learn such concepts using hands-on exercises and practical assignments and the data services focused on bringing data into SAP HANA. Prerequisite: MIS 6309. (3-0) Y
