Naveen Jindal School of Management

Master of Science in Finance

36 semester credit hours minimum

Faculty

Degree Requirements

At least 36 semester credit hours of management coursework beyond prerequisite courses is required, including 18 semester credit hours of basic business core courses and 18 semester credit hours of graduate finance courses. The MS in Finance is designed for students with or without previous educational background in finance. Many students will select the Financial Management option, which allows them to design a program to their needs.

For students wanting a more focused program, six concentrations are available: Financial Analyst, Corporate Finance/Investment Banking, Real Estate, Financial Risk Management, Energy Risk Management and Enterprise Risk Management. The Financial Analyst concentration is designed for students interested in pursuing an investment career and completing the Chartered Financial Analyst (CFA) examinations. The Corporate Finance/Investment Banking concentration is designed for students interested in corporate finance, investment banking, venture capital, private equity, or corporate restructuring and turnarounds. The Real Estate concentration prepares students for a career in real estate investing and development. The Financial Risk Management concentration prepares students for the Financial Risk Manager (FRM) exam and for managing the risk faced by financial institutions and investment funds. The Energy Risk Management concentration prepares students for the Energy Risk Professional (ERP) exam and managing the risk associated with energy markets. Finally, the Enterprise Risk Management concentration prepares students to achieve the ERM certification and manage many of the risks faced by non-financial companies. Because some of these concentrations have been designed to prepare students for certain certifications, students are recommended to focus on the coursework within a particular concentration in order to prepare for its associated certification.

Students must maintain a 3.0 grade-point average (GPA) in both core courses and in aggregate courses to qualify for the MS degree.

Prerequisites

Calculus and basic statistics are required as prerequisites. Candidates who have not taken equivalent courses will need to take OPRE 6303 to meet the calculus requirement and OPRE 6301 to complete the basic statistics requirement.
Course Requirements

Basic Core Courses: 18 semester credit hours

All students enrolling in the Master of Science in Finance program must complete the following Basic Business Core courses, or their equivalents. Please see the catalog for further prerequisite information.
