School of Arts, Technology, and Emerging Communication

Emerging Media and Communication (BA)

Students who complete the Emerging Media and Communication (EMAC) major are challenged to understand the social and cultural implications of communication in an "always on" world. The program reflects a commitment to the concept of applied humanities, as the curriculum balances theoretical understanding drawn from media studies, communication, psychology, and humanities with opportunities for practical application. These diverse perspectives will help a student majoring in EMAC develop the critical skills and technological expertise to become a communicator for the twenty-first century prepared to succeed in the shifting media landscape by using critical, creative, and collaborative skills to

• Develop creative ways to use emerging technology to express ideas and solve problems,
• Analyze communication opportunities to determine appropriate media and rhetorical strategies when creating content for existing and/or emerging media platforms,
• Adapt messages to audiences and technological constraints while retaining (and amplifying) the benefits provided by emerging media, and
• Anticipate the ethical implications of emerging media and their power to shape public opinion.

Unless otherwise noted, courses in Emerging Media and Communication are open to all students in the University.
