BMEN 7188 - Advanced Seminars in Biomedical Engineering I

BMEN 7188 Advanced Seminars in Biomedical Engineering I (1 semester credit hour) Doctoral students will learn to give effective short-formatted presentations about their research interests and findings, develop critical and relevant questions during a scientific talk, and use feedback to improve their presentation skills. Students will learn these skills through watching scientific presentations from their peers and by presenting aspects of their own research to their peers. Department consent required. (1-0) R
