Philosophy (BA)

Philosophy is one of the most broad-based, rigorous, interdisciplinary, and socially engaged of the liberal arts. Philosophy engages deep, important, and persistent questions, questions concerning the nature of the good life, why we believe and how we know, the nature of the self and its connection with the world and with society, and the foundations of justice. Philosophy engages such questions through critical analysis of textual evidence, clear and rigorous argumentation, and questioning of unexamined personal and cultural assumptions. The study of the history of philosophy from all cultures is central to this pursuit.

Far from being an abstruse, removed, and self-contained pursuit, Philosophy at UT Dallas is engaged and interdisciplinary. It is closely connected with the interdisciplinary Arts & Humanities program, drawing on and contributing to the study of history, literature, and the arts. It is particularly suited to the STEM excellence of UT Dallas, with a practical and theoretical emphasis on the philosophy of science, technology, and medicine. Finally, the UT Dallas Philosophy BA program is highly pluralistic and intellectually diverse, with emphases in continental, analytic, feminist, American, and non-Western philosophical traditions.

Since the following catalog course descriptions are very general, students are urged to consult the detailed course descriptions available on the web site for the School of Arts and Humanities.
