School of Behavioral and Brain Sciences

Neuroscience (BS)

Neuroscience is the multidisciplinary study of brain function that draws on recent advances in cell and molecular biology, biochemistry, biophysics, and computer and behavioral and cognitive sciences. It examines the brain's global and nanoscale biochemistry, its complex and extensively networked anatomical structure, and its remarkably adaptive physiology. The field considers neuronal development from early embryology through advanced senescence, and examines the brain's plasticity from the level of single proteins, of individual neurons, up through the level of networks or systems of cells, on up to complete behaving organisms. It studies the regulation and expression of behavior, the impact of that behavior on the brain, and the complex interactions of multiple neuronal systems that underlie the emergence of cognitive function. The Neuroscience program at UT Dallas provides students with the opportunity to focus on the brain from a systems-level perspective, drawing on behavioral and cognitive expertise combined with cellular and molecular analyses. It allows undergraduates extensive interactions with working neuroscientists who use the latest experimental techniques.

The Neuroscience program is designed to prepare students for admission to graduate, medical, or dental school, or for careers in related biomedical research, industry, and allied health science fields. Required courses and guided electives can include the approved pre-medical curriculum and offer an alternative to other traditional pre-health majors. Students who wish to continue their education in the fields of medicine, dentistry or allied professional areas should register with the Health Professions Advising Center during their first semester. Students are encouraged to design a personalized degree plan of guided electives with their advisor that combines courses from the neurosciences and related disciplines of mathematics, physics, chemistry, biology, engineering, computer science, psychology, and speech pathology and audiology in a way that will suit their individual interests and goals. Students are also strongly encouraged to gain research experience as part of their undergraduate training in Neuroscience.

Students can complete Core Curriculum and Neuroscience major requirements in a minimum of 85 semester credit hours, leaving 35 elective semester credit hours. Students can complete Core Curriculum, Neuroscience major, and pre-health Professions requirements in a minimum of 111 semester credit hours, leaving 9 remaining elective semester credit hours.

Bachelor of Science in Neuroscience

Degree Requirements (120 semester credit hours)[1]

View an Example of Degree Requirements by Semester

Faculty

Associate Professors: Gregory Dussor, Francesca Filbey, Daniel Krawczyk, Sven Kroener, Mandy J. Maguire, Christa McIntyre Rodriguez, Amy Pinkham, Theodore Price, Bart Rypma, Lucien (Tres) Thompson, Sven Vanneste

Assistant Professors: Chandramallika Basak, Xiaosi Gu, Kristen Kennedy, Jonathan E. Ploski, Karen Rodrigue, Gagan Wig

Senior Lecturers: Steven McWilliams, Van Miller

I. Core Curriculum Requirements: 42 semester credit hours

Communication: 6 semester credit hours

  - COMM 1311 Survey of Oral and Technology-based Communication
  - RHET 1302 Rhetoric

Mathematics: 3 semester credit hours
Choose one course from the following:

  - MATH 2414 Integral Calculus
  - MATH 2417 Calculus I

Life and Physical Sciences: 6 semester credit hours

  - CHEM 1311 General Chemistry
  - BIOL 2311 Introduction to Modern Biology

Language, Philosophy and Culture: 3 semester credit hours
Choose one course from the following:

  - HUMA 1301 Exploration of the Humanities
  - LIT 2331 Masterpieces of World Literature
  - PHIL 1301 Introduction to Philosophy
  - PHIL 2316 History of Philosophy I
  - PHIL 2317 History of Philosophy II

Creative Arts: 3 semester credit hours
Choose one course from the following:

  - AHST 1303 Survey of Western Art History: Ancient to Medieval
  - AHST 1304 Survey of Western Art History: Renaissance to Modern
  - AHST 2331 Understanding Art
ARTS 1301 Exploration of the Arts
DANC 1310 Understanding Dance
THEA 1310 Understanding Theater
FILM 2332 Understanding Film
MUSI 1306 Understanding Music

American History: 6 semester credit hours
Choose two courses from the following:
HIST 1301 U.S. History Survey to Civil War
HIST 1302 U.S. History Survey from Civil War
HIST 2301 History of Texas
HIST 2330 Themes and Ideas in American History
HIST 2332 Civil War and Reconstruction

Government / Political Science: 6 semester credit hours
GOVT 2305 American National Government
GOVT 2306 State and Local Government

Social and Behavioral Sciences: 3 semester credit hours
PSY 2301 Introduction to Psychology

Component Area Option: 6 semester credit hours
PSY 2317 Statistics for Psychology
or STAT 1342 Statistical Decision Making
or STAT 2332 Introductory Statistics for Life Sciences
AND
CHEM 1312 General Chemistry II

II. Major Requirements: 45 semester credit hours

Major Preparatory Courses: 24 semester credit hours - 6 semester credit hours beyond Core Curriculum
All of the following:
BIOL 2111 Introduction to Modern Biology Workshop I
**BIOL 2281** Introductory Biology Laboratory

**BIOL 2311** Introduction to Modern Biology 3

**CHEM 1111** General Chemistry Laboratory I

**CHEM 1311** General Chemistry I 3

**CHEM 1112** General Chemistry Laboratory II

**CHEM 1312** General Chemistry II 3

**MATH 2414** Integral Calculus 3

or **MATH 2417** Calculus I 3

**PSY 2301** Introduction to Psychology 3

**PSY 2317** Statistics for Psychology 3

or **STAT 1342** Statistical Decision Making 3

or **STAT 2332** Introductory Statistics for Life Sciences 3

**Major Core Courses: 24 semester credit hours**

All of the following:

**NSC 3361** Introduction to Neuroscience

**NSC 4352** Cellular Neuroscience

**NSC 4353** Neuroscience Laboratory Methods

**NSC 4354** Integrative Neuroscience

**NSC 4356** Neurophysiology

**NSC 4363** Neuropharmacology

**NSC 4366** Neuroanatomy

And one emphasis course from the following six:

**NSC 4357** Neurobiology of Learning and Memory

or **NSC 4367** Developmental Neurobiology

or **NSC 4371** Neural Plasticity

or **NSC 4373** Sensory Neuroscience

or **NSC 4362** Molecular Neuroscience

or **NSC 4385** Neuropsychology

**Major Related Courses: 15 semester credit hours**

Guided Electives: 15 semester credit hours from the following list 4
III. Elective Requirements: 33 semester credit hours

Free Electives: 33 semester credit hours

At least 33 semester credit hours of lower- or upper-division courses of the student's choice. Students are encouraged to explore areas of concentration in Neuroscience as well as explore interests outside the field. Be aware that at least 51 semester credit hours of upper-division courses are required for graduation.

Pre-medical and/or other pre-health students should take the following required courses as part of their concentration:

Required pre-medical courses (12 semester credit hours)

- **BIOL 2112** Introduction to Modern Biology II Workshop
- **BIOL 2312** Introduction to Modern Biology II
- **CHEM 2123** Introductory Organic Chemistry Laboratory I
- **CHEM 2125** Introductory Organic Chemistry Laboratory II
- **CHEM 2323** Introductory Organic Chemistry I
- **CHEM 2325** Introductory Organic Chemistry II

Pre-med Advanced Biology requirement (8 semester credit hours, select 2 courses and corresponding workshop courses)

- **BIOL 3101** Classic and Molecular Genetics Workshop
- **BIOL 3301** Classic and Molecular Genetics
- **BIOL 3102** Eukaryotic Molecular and Cell Biology Workshop
**Pre-med Physics requirement (8 semester credit hours, select 2 courses and corresponding lab courses)**

- **PHYS 1101** College Physics Laboratory I
- **PHYS 1102** College Physics Laboratory II
- **PHYS 1301** College Physics I
- **PHYS 1302** College Physics II
- **PHYS 2125** Physics Laboratory I
- **PHYS 2126** Physics Laboratory II
- **PHYS 2325** Mechanics
- **PHYS 2326** Electromagnetism and Waves

**Pre-med electives (5 semester credit hours)**

**Fast Track Baccalaureate/Master's Degrees**

UT Dallas undergraduate students with strong academic records who intend to pursue a master's degree in Applied Cognition and Neuroscience at UT Dallas may consider an accelerated undergraduate-graduate plan of study. If accepted into the program, students may take up to 15 semester credit hours of graduate courses that may be used to complete the baccalaureate degree and also satisfy requirements for the master's degree. Students must maintain a 3.000 grade point average and earn grades of B or better in graduate courses taken.

Students should apply for Fast Track admission in the semester they reach 90 semester credit hours. To qualify for application, undergraduate students must have completed at least 18 semester credit hours in major core courses at UT Dallas. To be eligible for Fast Track admission, students must have completed at least 90 semester credit hours toward a baccalaureate degree, and meet program admission requirements. Apply to the Fast Track program through the Applied Cognition and Neuroscience Program Office. Students should consult with a graduate advisor regarding admissions criteria and plans of study.

1. Incoming freshmen must enroll and complete requirements of UNIV 1010 and the corresponding school-related freshman seminar course. Students, including transfer students, who complete their core curriculum at UT Dallas must take UNIV 2020.
2. Curriculum Requirements can be fulfilled by other approved courses from accredited institutions of
higher education. The courses listed are recommended as the most efficient way to satisfy both Core Curriculum and Major Requirements at UT Dallas.

3. A required preparatory course that also fulfills a Core Curriculum requirement. Eighteen (18) semester credit hours are counted in Core Curriculum.

4. The Emphasis Course selected above will not count twice as a Guided Elective. Consultation with an advisor is required.

5. May be repeated for credit, up to 9 semester credit hours.

6. May be repeated for credit, up to 6 semester credit hours.

7. Algebra-based Physics courses

8. Calculus-based Physics courses
