Erik Jonsson School of Engineering and Computer Science

Department of Electrical and Computer Engineering

Electrical Engineering (BSEE)

The Electrical and Computer Engineering Department offers a bachelor's degree in Electrical Engineering. The Electrical Engineering program offers students an opportunity to acquire a solid foundation in the broad areas of electrical engineering and emphasizes advanced study in digital systems, digital signal processing, communications, analog systems, RF/microwave, and microelectronics.

The Electrical Engineering program offers students a solid educational foundation in the areas of electrical networks, electronics, electromagnetics, computers, digital systems, and communications and is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET). Mastery of these areas provides students with the ability to adapt and maintain leadership roles in their post-baccalaureate pursuits through the application of fundamental principles to a rapidly changing and growing discipline.

Students in the Electrical Engineering program a broad general program in electrical engineering and can then take advanced courses in computer hardware and software; the analysis and design of analog and digital communication systems; analog and digital signal processing; the analysis, design, and fabrication of microelectronic components and systems; and guided and unguided wave propagation. A broad choice of electives (within and external to electrical engineering) allows students to broaden their education as well as develop expertise in areas of particular interest. In keeping with the role of a professional, students are expected to develop communication skills and an awareness of the relationship between technology and society.

The Electrical Engineering program is based on a solid foundation of science and mathematics coursework. Students in this program are given an opportunity to learn and extend their abilities to analyze and solve complex problems and to design new uses of technology to serve today's society. The engineering programs at UT Dallas provide an integrated educational experience directed toward the development of the ability to apply pertinent knowledge to the identification and solution of practical problems in Electrical and other related engineering fields. These programs ensure that the design experience, which includes both analytical and experimental studies, is integrated throughout the curriculum in a sequential development leading to advanced work. Design problems are frequently assigned in both lecture and laboratory courses. Each student is required to complete a major design project during the senior year. In addition, established cooperative education programs with area industry serve to further supplement design experiences.

Mission of the Electrical Engineering Program

The focus of the Electrical Engineering degree is to provide excellent education in modern electrical engineering practice. Our graduates are uniquely qualified for rewarding and successful careers in
materials, devices, circuits, digital systems, signal processing, and communications. In the spring of 2005 the EE faculty adopted a new set of Program Educational Objectives that refined the prior objectives and established measurements and benchmarks to monitor progress. A feedback mechanism using Alumni Surveys (by the ECS Office of Assessment) and other tools are used to measure progress toward these objectives.

Program Educational Objectives for Electrical Engineering
One broad goal for the Erik Jonsson School is an excellent education for our students. Within a few years of graduation, graduates of the Electrical Engineering program should:

• Have a successful, long-lived engineering based career path.
• Meet the needs of industry.
• Contribute to, and/or lead engineering based teams.
• Actively pursue continuing (lifelong) learning.

High School Preparation
Engineering education requires a strong high school preparation. Pre-engineering students should have high school preparation of at least one-half year in trigonometry and at least one year each in elementary algebra, intermediate and advanced algebra, plane geometry, chemistry, and physics, thus developing their competencies to the highest possible levels and preparing to move immediately into demanding college courses in calculus, calculus-based physics, and chemistry for science majors. It is also essential that pre-engineering students have the competence to read rapidly and with comprehension, and to write clearly and correctly.

Lower-Division Study
All lower-division students in Electrical Engineering concentrate on mathematics, science, and introductory engineering courses, building competence in these cornerstone areas for future application in upper-division engineering courses. The following requirements apply both to students seeking to transfer to UT Dallas from other institutions as well as to those currently enrolled at UT Dallas, whether in another school or in the Erik Jonsson School of Engineering and Computer Science.

ABET Accreditation
The BS program in Electrical Engineering is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Academic Progress in Electrical Engineering
In order to make satisfactory academic progress as an Electrical Engineering major, a student must meet all University requirements for academic progress, and must earn a grade of C- or better in each of the "major requirements" courses. No "Major Requirements" course (as listed under Section II of the BSEE degree requirement) may be taken until the student has obtained a grade of C- or better in each of the prerequisites (if a higher grade requirement is stated for a specific class, the higher requirement applies).
Bachelor of Science in Electrical Engineering

**Degree Requirements** (128 semester credit hours)¹

*View an Example of Degree Requirements by Semester*

**Faculty**

**Professors Emeritus:** Louis R. Hunt, Duncan L. MacFarlane, William J. Pervin, Don Shaw

**Research Professors:** Andrew Marshall, Hisashi (Sam) Shichijo

**Associate Professors:** Bilal Akin, Carlos A. Busso-Recabarren, Rashaunda Henderson, Siavash Pourkamali, Chin-Tuan Tan

**Associate Professor Emeritus:** Gerald O. Burnham

**Clinical Associate Professor:** Nicholas Gans

**Assistant Professors:** Benjamin Carrion Schafer, Joseph Friedman, Qing Gu, Jeyavijayan Rajendran, Chadwin D. Young

**Senior Lecturers:** Peter A. Blakey, Diana Cogan, Paul Deignan, James Florence, Matthew Heins, Jung Lee, Randall E. Lehmann, Miguel Razo-Razo, Ricardo E. Saad, William (Bill) Swartz, Marco Tacca

**UT Dallas Affiliated Faculty:** Larry P. Ammann, Leonidas Bleris, Yves J. Chabal, Wonjae Choi, Massimo V. Fischetti, Matthew J. Goeckner, Robert D. Gregg, Zygmunt Haas, Christopher L. Hinkle, Kenneth Hoyt, Russell A. Hulse, Jiyoung Kim, Moon J. Kim, David J. Lary, Yaoyu Li, Yang Liu, Ann Majewicz Fey, S.O. Reza Moheimani, Wooram Park, Robert L. Rennaker II, Fabiano Rodrigues, Mario A. Rotea, Justin Ruths, Tyler Summers, Yonas Tadesse, William VanDenbergh, Mathukumalli Vidyasagar, Amy V. Walker, Robert M. Wallace, Jun Wang, Steve Yurkovich, Jie Zhang

I. Core Curriculum Requirements: 42 semester credit hours²

**Communication:** 6 semester credit hours

**RHET 1302** Rhetoric

**ECS 3390** Professional and Technical Communication³

**Mathematics:** 3 semester credit hours
Life and Physical Sciences: 6 semester credit hours

PHYS 2325 Mechanics\(^5\)

PHYS 2326 Electromagnetism and Waves\(^5\)

Language, Philosophy and Culture: 3 semester credit hours

Select any 3 semester credit hours from Language, Philosophy and Culture core courses (see advisor)

Creative Arts: 3 semester credit hours

Select any 3 semester credit hours from Creative Arts core courses (see advisor)

American History: 6 semester credit hours

Select any 6 semester credit hours from American History core courses (see advisor)

Government / Political Science: 6 semester credit hours

GOVT 2305 American National Government

GOVT 2306 State and Local Government

Social and Behavioral Sciences: 3 semester credit hours

ECS 3361 Social Issues and Ethics in Computer Science and Engineering\(^6\)

Component Area Option: 6 semester credit hours

MATH 2417 Calculus I\(^4\)

MATH 2419 Calculus II\(^4\)

PHYS 2125 Physics Laboratory I\(^5\)

II. Major Requirements: 76 semester credit hours\(^7\)

Major Preparatory Courses: 22 semester credit hours beyond Core Curriculum

CHEM 1111 General Chemistry Laboratory I

CHEM 1311 General Chemistry I

CS 1325 Introduction to Programming

EE 1100 Introduction to Electrical Engineering\(^8\)

ECS 1100 Introduction to Engineering and Computer Science

EE 1202 Introduction to Electrical Engineering II\(^8\)
ENGR 2300  Linear Algebra for Engineers
EE 2310  Introduction to Digital Systems
MATH 2417  Calculus I
MATH 2419  Calculus II
MATH 2420  Differential Equations with Applications
PHYS 2125  Physics Laboratory I
PHYS 2126  Physics Laboratory II
PHYS 2325  Mechanics
PHYS 2326  Electromagnetism and Waves

Major Core Courses: 45 semester credit hours beyond Core Curriculum

ECS 3361  Social Issues and Ethics in Computer Science and Engineering
ECS 3390  Professional and Technical Communication
EE 3101  Electrical Network Analysis Laboratory
EE 3102  Signals and Systems Laboratory
EE 3110  Electronic Devices Laboratory
EE 3111  Electronic Circuits Laboratory
EE 3120  Digital Circuits Laboratory
EE 3150  Communications Systems Laboratory
ENGR 3300  Advanced Engineering Mathematics
EE 3301  Electrical Network Analysis
EE 3302  Signals and Systems
EE 3310  Electronic Devices
EE 3311  Electronic Circuits
EE 3320  Digital Circuits
ENGR 3341  Probability Theory and Statistics
EE 3350  Communications Systems
EE 4301  Electromagnetic Engineering I
EE 4310  Systems and Controls
EE 4368  RF Circuit Design Principles
EE 4388  Senior Design Project I
EE 4389 Senior Design Project II

Major Guided Electives: 9 semester credit hours

Students pursuing the general program take 9 semester credit hours from any other 4000 level or higher Electrical Engineering courses. Independent Study in Electrical Engineering (EE 4V97), Undergraduate Research in Electrical Engineering (EE 4V98), or Senior Honors in Electrical Engineering (EE 4399) may be used for up to 6 of these hours.

Students pursuing a concentration in Microelectronics take 3 of the following courses:

EE 4302 Electromagnetic Engineering II
EE 4304 Computer Architecture
EE 4325 Introduction to VLSI Design
EE 4330 Integrated Circuit Technology
EE 4340 Analog Integrated Circuit Analysis and Design
EE 4391 Technology of Plasma

Students pursuing a concentration in Telecommunications take 3 of the following courses:

EE 4360 Digital Communications
EE 4361 Introduction to Digital Signal Processing
EE 4365 Introduction to Wireless Communication
EE 4367 Telecommunications Networks
EE 4390 Computer Networks
EE 4392 Introduction to Optical Systems

III. Elective Requirements: 10 semester credit hours

Free Electives: 10 semester credit hours

Both lower- and upper-division courses may count as free electives but students must complete at least 51 semester credit hours of upper-division courses to qualify for graduation.

Degree programs in the Erik Jonsson School of Engineering and Computer Science are governed by various accreditation boards that place restrictions on classes used to meet the curricular requirements of degrees they certify. For this reason, not all classes offered by the University can be used to meet elective requirements. Please check with your academic advisor before enrolling in classes you hope to use as free electives.

Fast Track Baccalaureate/Master's Degrees

In response to the need for advanced education in electrical engineering, a Fast Track program is available to well-qualified UT Dallas undergraduate students. Qualified seniors may take up to 15 graduate semester
credit hours that may be used to complete the baccalaureate degree and also to satisfy the requirements
for the master's degree. This is accomplished by (1) taking courses (typically electives) during one or more
summer semesters, and (2) beginning graduate coursework during the senior year. Details are available
from the Associate Dean for Undergraduate Education.

Honors Program
The Department of Electrical and Computer Engineering offers Departmental Honors for outstanding
students in the BS Electrical Engineering degree program. Admission to the Honors programs requires that
the student meet the following qualifications:

• Has repeated no more than 3 courses at UT Dallas and has repeated no course more than once.

Graduation with Honors requires a 3.500 or better GPA and completion of either Senior Honors in Electrical
Engineering (EE 4399) or Undergraduate Research in Electrical Engineering (EE 4V98). A Senior Honors
Thesis must be completed within one of those two classes. (While the topics may be related, the Senior
Thesis does not replace the need for the student to complete a regular Senior Design Project).

Departmental Honors with Distinction may be awarded to students whose Senior Honors Thesis is judged
by a faculty committee to be of exemplary quality. Only students graduating with Departmental Honors are
eligible. Thesis/projects must be submitted by the deadline that applies to MS Theses in the graduating
semester to allow for proper evaluation. Students interested in Honors with Distinction are encouraged to
start working on their thesis/project a year prior to graduation.

Minors
The Department of Electrical and Computer Engineering does not offer minors at this time.

1. Incoming freshmen must enroll and complete requirements of UNIV 1010 and the corresponding school-
related freshman seminar course. Students, including transfer students, who complete their core curriculum at
UT Dallas must take UNIV 2020.

2. Curriculum Requirements can be fulfilled by other approved courses. The courses listed are recommended as
the most efficient way to satisfy both Core Curriculum and Major Requirements at UT Dallas.

3. Semester credit hours fulfill the communication component of the Core Curriculum.

4. Three semester credit hours of Calculus are counted under Mathematics Core, and five semester credit hours
of Calculus are counted as Component Area Option Core.

5. Six semester credit hours of Physics (PHYS 2325 and PHYS 2326) are counted under Science Core and one
semester credit hour (PHYS 2125) is counted under the Component Area Option Core.

6. Semester credit hours contribute to the Social and Behavioral Sciences component of the Core Curriculum.

7. Students must pass each of the EE, CS, Math and Science courses listed in this degree plan and each of their
prerequisites, with a grade of C- or better.

8. Transfer students with sufficient background may petition to substitute upper-division semester credit hours in
the major for this class.
