Degree Requirements

The Master of Science in Finance (MS FIN) at the Naveen Jindal School of Management is a minimum 36 semester credit hours STEM (Science, Technology, Engineering and Mathematics) degree program that provides students with the practical and theoretical knowledge needed by finance professionals. Students learn the quantitative skills required to analyze financial information, make financial decisions and valuations, select and analyze portfolios and manage risk. The program is designed for students with or without previous educational background in finance. The Jindal School offers two options for students.
(1) The MS Finance Program allows students the flexibility to complete the program at their own pace, choose courses, and gain knowledge to pursue opportunities in finance or real estate. Admission to the program occurs in Fall, Spring and Summer semesters.

(2) The MS Finance Cohort Program is a one-year program in which students take all courses together as a cohort. It is designed for students from various backgrounds to gain knowledge to pursue opportunities in finance. Admission to the program occurs only in the Fall semester. The program is a lock-step program with no flexibility for choosing electives. Special tuition, fees and admissions requirements apply and the program is supported entirely by participant tuition/fees.

To apply for this degree program, an undergraduate degree is required (all majors are considered). Students must maintain a 3.0 grade-point average (GPA) in both core courses and in aggregate courses to qualify for the MS degree.

Prerequisites

Students pursuing the Master of Science in Finance degree program are required to complete one semester credit hour of **MAS 6102** Professional Development. In addition, knowledge of calculus and statistics are required and students who have not completed undergraduate calculus and statistics courses may satisfy the prerequisites by completing **OPRE 6303** Quantitative Foundations of Business and **OPRE 6301** Statistics and Data Analysis with grades of "B" or better. Degree credit is not earned for program prerequisites, however, the grade achieved in prerequisites will count toward the student's grade-point average (GPA). All program prerequisites must be satisfied within the first semester of graduate study as a degree-seeking student.
