ECON 4334 - Experimental Economics

ECON 4334 Experimental Economics (3 semester credit hours) This is a course in the use of laboratory methods to study behavior in economics and the social sciences. Students will study state-of-the-art methodology in experimental economics, including experimental design, laboratory technique, financial incentives, and analysis of data. Students will participate in, design, and conduct experiments in bargaining, auctions, asset markets, public goods and commons situations, and risky decision-making. Prerequisite: ECON 3310. (3-0) T
