

PPOL4302 - Data and Policy

[PPOL 4302](#) Data and Policy (3 semester credit hours) This course examines the implications of data for policy and policy for data. Policy topics will focus on the relationship between data privacy and security at the national and international level. Students will learn about relevant legislation and its practical and theoretical implications. We will explore contemporary types of data, the ways these data are changing as a result of technological innovations, and the impact of these changes on our privacy and security. (Same as [PSCI 4302](#)) (3-0) T
