MIS6308 - System Analysis and Project Management

MIS 6308 (ACCT 6340) System Analysis and Project Management (3 semester credit hours)
Provides the student with an in-depth knowledge of object oriented systems analysis and
design procedures. Software project management techniques will be introduced. At the end of
the course, the student will be able to analyze business solutions and design computer based
information systems using object-oriented methodologies. Prerequisite or Corequisite: MIS 632
0 or MIS 6326. (3-0) R
