Degree Requirements

The Master of Science in Finance (MS FIN) is a minimum 36 semester credit hours STEM (Science, Technology, Engineering and Mathematics) degree program that provides students with the practical and theoretical knowledge needed by finance professionals. Students gain the quantitative and managerial skills to analyze financial information, make financial decisions and valuations, select and analyze portfolios and manage risk.

The core courses provide the foundation for evaluating financial issues. The finance electives allow students to apply those tools to the complex business issues experienced by business organizations. The Jindal School offers two options for students.

To apply for this degree program, an undergraduate degree is required (all majors are considered). Students must maintain a 3.0 grade-point average (GPA) in both core courses and in all graduate courses taken in the degree program, excluding program prerequisites to qualify for the MS degree.
Prerequisites

Students pursuing the Master of Science in Finance degree program are required to complete one semester credit hour of **MAS 6102** Professional Development. In addition, knowledge of calculus and statistics are required and students who have not completed undergraduate calculus and statistics courses may satisfy the prerequisites by completing **OPRE 6303** Quantitative Foundations of Business and **OPRE 6301** Statistics and Data Analysis. Degree credit is not earned for program prerequisites, however, the grade achieved in prerequisites will count toward the student's grade-point average (GPA). All program prerequisites must be satisfied within the first semester of graduate study as a degree-seeking student.
