Actuarial Science (BS)

The Bachelor of Science Actuarial Science (AS) Program at The University of Texas at Dallas is administered through the Department of Mathematical Sciences. Students receive rigorous mathematical background including all the major courses taken by students majoring in mathematics or statistics. Further, a number of courses devoted to computer science, finance, economics, accounting, statistics, insurance, information technology and actuarial science are required. All students are prepared to take four actuarial preliminary exams (Probability - P/1, Financial Mathematics - FM/2, Investment and Financial Markets - IFM/3F, Statistics for Risk Modeling - SRM) and achieve Validation of Educational Experience (VEE) credits in accounting and corporate finance, economics, and mathematical statistics. Students also receive rigorous instruction in preparation for a major part of the two additional actuarial preliminary exams (Long Term Actuarial Mathematics - LTAM/LC and Short Term Actuarial Mathematics - STAM/4) as well as for the two CAS Exams (Modern Actuarial Statistics I and II - MAS I and MAS II). Upon completion of this program, a student will have the knowledge and business background necessary to pursue a career as an actuary, as well as to undertake graduate study in actuarial science, statistics, mathematics, economics, or finance.

**Fast Track Baccalaureate/Master’s Degrees**

In response to the need for post-baccalaureate education, a Fast Track program is available to well-qualified UT Dallas undergraduate students. Qualified seniors may take up to 15 graduate semester credit hours that may be used to complete the baccalaureate degree and also to satisfy the requirements for the master's degree. Interested students should see the Associate Dean of Undergraduate Education (ADU) for specific requirements.

1. Incoming freshmen must enroll and complete requirements of UNIV 1010 and the corresponding school-related freshman seminar course. Students, including transfer students, who complete their core curriculum at UT Dallas must take UNIV 2020.

2. Curriculum Requirements can be fulfilled by other approved courses from accredited institutions of higher education. The courses are recommended as the most efficient way to satisfy both Core Curriculum and Major Requirements at UT Dallas.

3. A required Major preparatory course that also fulfills a Core Curriculum requirement. Semester credit hours are counted in Core Curriculum.

4. Three semester credit hours of Calculus are counted to fulfill the Mathematics Core Requirement with the remaining one semester credit hour to be counted under Component Area Option Core Requirement.

5. Students may choose one of the following calculus sequences: (a) MATH 2413, MATH 2414, and MATH 2415; or (b) MATH 2417 and MATH 2419.

6. Six semester credit hours of Physics or Chemistry are counted under Science core, and one semester credit hour of Physics or Chemistry (PHYS 2125 or CHEM 1111) are counted under Component Area Option core.

7. Please consult your advisor if selecting Honors Physics or if you have taken BA 1100.

8. Students may use three semester credit hours of PHYS 2421 to count under Science core, and one semester credit hour of PHYS 2421 under Component Area Option core.

9. MATH 2370 will provide a better preparation for MATH 4334 Numerical Analysis course.

10. MATH 2451 may be taken in the Summer if offered.

11. Students who complete PHYS 2421 do not need to complete PHYS 2125.
