School of Natural Sciences and Mathematics

The Biology Program at UT Dallas emphasizes the unifying molecular and cellular nature of organisms. At the center of the Biology undergraduate curriculum are the biochemical, genetic, and cell biology concepts and tools used to study the genes of prokaryotes and eukaryotes, to study the proteins and ribonucleic acids (RNA) encoded by these genes, and to study how the expression of these genes is regulated during the development and lifetimes of organisms. Molecular Biology represents a fusion of the four disciplines of biochemistry, biophysics, genetics, and cell biology. Modern biology requires a background in other disciplines such as chemistry, mathematics, physics, and computer sciences. Principles from these disciplines have to be merged to understand and apply new biotechnology and genetic engineering techniques. It is desirable for entering students to have a broad interest and background in the sciences.

Biology (BA, BS)

Both BS and BA degrees are offered in Biology at UT Dallas. The BS degrees are intended as preparation for scientific careers in biology or careers in the health professions. The BA degree is intended as a liberal arts biology major with less emphasis on calculus and more semester credit hours free for coursework in other disciplines. Biology offers a streamlined double major with Business Administration or Criminology. Fast Track BS / MS Biology and Molecular Biology degree programs are available.

**BIOL 3380** Biochemistry Laboratory

**BIOL 4380** Cell and Molecular Biology Laboratory (BS only)

**Major Related Courses: 9-12 semester credit hours**

9 semester credit hours of upper-division **BIOL** electives (BA only)

12 semester credit hours of upper-division **BIOL** electives (BS only)

**III. Elective Requirements: 16-25 semester credit hours (22-25 for BA; 16-19 for BS)**

The plan must include sufficient upper-division courses to total 51 upper-division semester credit hours.

**UTeach Option**

The **UTeach option** may be added to either the BA or BS degree. UTeach Dallas Option degree plans are streamlined to allow students to complete both a rigorous Bachelor of Science or Bachelor of Arts
degree and all coursework for middle or high school teacher certification in four years. Teaching Option
degrees require deep content knowledge combined with courses grounded in the latest research on math
and science education. While most graduates go on to classroom teaching, UTeach alums are also
prepared to enter graduate school and to work in a discipline related industry.

Fast Track Baccalaureate/Master's Degrees

UT Dallas undergraduate students with strong academic records, including at least 15 semester credit
hours of upper-division Biology core courses, who intend to pursue graduate work in Biology at UT Dallas,
may apply for the Fast Track which involves taking selected graduate courses as an upper-division
student. After Fast Track admission to the graduate program, 15 semester credit hours of graduate
courses with an earned grade of B or better can be used toward completion of the BS and to satisfy
requirements for those courses at the graduate level. Graduate courses must be approved by the
graduate advisor. This program provides an opportunity to obtain the BS degree in Biology after 120
semester credit hours of work and an MS degree in Molecular and Cell Biology after an additional 21
semester credit hours of graduate course and research work. Interested students should contact the
Biology undergraduate advisor well in advance of the senior year to prepare a degree plan taking maximal
advantage of this Fast Track program.

Degree Planning

Upper-division biology courses taken at other institutions may be included as part of the degree plan
subject to the provisions of the section on Transfer Admissions.

Major-related courses may not include more than 9 semester credit hours (BS) or 6 semester credit hours
(BA) of upper-division transfer credit and not more than 3 semester credit hours (Biology major) or 6
semester credit hours (Molecular Biology major) of individual instruction (e.g., BIOL 3V90, BIOL 3V91, BI
OL 3V96, BIOL 4302, BIOL 4390, BIOL 4391, BIOL 4399, or BIOL 4V99).

Students planning a career in a particular allied health profession should consult the school they expect to
attend to apprise themselves of the course requirements for admission.

Admission standards for medical and dental schools are set by the individual professional school, whose
specific requirements should be reviewed with the help of the UT Dallas Health Professions Advising
Center (HPAC). Most professional schools prefer that admission applications be channeled through the
HPAC.

1. Incoming freshmen must enroll and complete requirements of UNIV 1010 and the corresponding school-
related freshman seminar course. Students, including transfer students, who complete their core curriculum at
UT Dallas must take UNIV 2020.

2. Curriculum Requirements can be fulfilled by other approved courses from institutions of higher education. The
courses listed are recommended as the most efficient way to satisfy both Core Curriculum and Major
Requirements at UT Dallas.

3. A required Major course that also fulfills a Core Curriculum requirement. Semester credit hours are counted in
Core Curriculum.
4. Six semester credit hours of Calculus are counted under Mathematics Core and Component Area Option and 2 semester credit hours of Calculus are counted as Major Preparatory Courses.

5. Students may substitute MATH 2413 and MATH 2414 by taking MATH 2417 and MATH 2419.

6. Indicates a prerequisite class to be completed before enrolling for upper-division classes.

7. Students who complete PHYS 2421 do not need to complete PHYS 2125.

8. Up to 3 semester credit hours of individual instruction may be used in fulfilling this requirement for BA degree. Up to 6 semester credit hours of individual instruction may be used in fulfilling this requirement for BS degree.
