School of Arts, Technology, and Emerging Communication

Arts, Technology, and Emerging Communication (BA)

This general degree plan emphasizes the breadth of the School's interdisciplinary programs, which allows students to explore early courses across the curriculum. This offers students an opportunity to explore the School's foundation courses in which they will develop the experience and materials needed before choosing whether to apply to specialize in a concentration with greater depth in Animation and Games or Critical Media Studies.

Unless otherwise noted, courses in Arts, Technology, and Emerging Communication are open to all students in the University. However, students majoring in Arts, Technology, and Emerging Communication may be given preference in certain course enrollments.
